This Prospectus contains information you should consider before you invest in the LKCM Funds. Please read it carefully and keep it for future reference.

Neither the Securities and Exchange Commission (the “SEC”) nor any state securities commission has approved or disapproved of the securities offered by this Prospectus, nor has the SEC or any state securities commission passed upon the adequacy of this Prospectus. Any representation to the contrary is a criminal offense.

Beginning on January 1, 2021, as permitted by regulations adopted by the Securities and Exchange Commission, paper copies of the LKCM Funds’ shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports from the LKCM Funds (if you hold your Fund shares directly with the LKCM Funds) or from your financial intermediary, such as a broker-dealer or bank (if you hold your Fund shares through a financial intermediary). Instead, the reports will be made available on a website, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. If you hold your Fund shares directly with the LKCM Funds, you may elect to receive shareholder reports and other communications electronically from the LKCM Funds by calling 1-800-688-LKCM or, if you hold your Fund shares through a financial intermediary, by contacting your financial intermediary.

You may elect to receive all future reports on paper free of charge. If you hold your Fund shares directly with the LKCM Funds, you can inform the LKCM Funds that you wish to continue receiving paper copies of your shareholder reports by calling 1-800-688-LKCM or, if you hold your Fund shares through a financial intermediary, contacting your financial intermediary. Your election to receive reports in paper will apply to all of the LKCM Funds you hold directly with LKCM Funds or all of the funds you hold through your financial intermediary, as applicable.

SUMMARY SECTION

LKCM SMALL CAP EQUITY FUND

Investment Objective: The Fund seeks to maximize long-term capital appreciation.

Fees and Expenses of the Fund: The following table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. The Fund does not impose any sales charges in connection with purchases and sales of Fund shares. However, you may be required to pay a commission to your financial intermediary on purchases and sales of Fund shares, which are not reflected in the tables or example below.

Shareholder Fees

(fees paid directly from your investment)

Redemption Fee (as a percentage of the amount redeemed on shares held for less than 30 days)	1.00%
--	-------

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment)

Management Fees	0.75%
Distribution and Service (12b-1) Fees	0.00%
Other Expenses	0.32%
Acquired Fund Fees and Expenses ⁽¹⁾	0.01%
Total Annual Fund Operating Expenses	1.08%
Fee Waiver and/or Expense Reimbursement ⁽²⁾	-0.07%
Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement ⁽²⁾	1.01%

⁽¹⁾ Acquired Fund Fees and Expenses are indirect fees and expenses that funds incur from investing in the shares of other investment companies, including money market funds. The Total Annual Fund Operating Expenses and Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement for the Fund differ from the Ratio of Expenses to Average Net Assets before and after expense waiver and/or reimbursement found within the “Financial Highlights” section of the Prospectus because the audited information in the “Financial Highlights” reflects the operating expenses of the Fund and does not include indirect expenses such as Acquired Fund Fees and Expenses.

⁽²⁾ Luther King Capital Management Corporation (“Adviser”), the Fund’s investment adviser, has contractually agreed to waive all or a portion of its management fee and/or reimburse the Fund through May 1, 2021 in order to limit the Fund’s Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement to 1.00% per annum (excluding any interest, taxes, brokerage commissions, indirect fees and expenses related to investments in other investment companies, including money market funds (“Acquired Fund Fees and Expenses”), and extraordinary expenses). The fee waiver and expense reimbursement agreement may be terminated or changed only with the consent of the Board of Trustees.

Example

The following example is intended to help you compare the costs of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same (except that the example reflects the fee waiver/expense reimbursement arrangement through May 1, 2021). Although your actual costs may be higher or lower, based on these assumptions, whether or not you redeem your shares, your costs would be as follows:

<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
\$103	\$337	\$589	\$1,311

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 63% of the average value of its portfolio.

Principal Investment Strategies: The Fund seeks to achieve its investment objective by investing under normal circumstances at least 80% of its net assets (plus any borrowings for investment purposes) in equity securities of smaller companies. The Fund primarily chooses investments that the Adviser believes are likely to have above-average growth in revenue and/or earnings and potential for above-average capital appreciation. Smaller companies are those with market capitalizations at the time of investment between \$600 million and \$5 billion. The Fund is not required to sell equity securities whose market values appreciate or depreciate outside this market capitalization range. From time to time, in pursuing its investment strategies, the Fund may hold a significant percentage of its investments in specific sectors of the economy.

The Fund seeks to invest in the equity securities of high quality companies, as determined by the Adviser, that typically exhibit certain characteristics, including high profitability levels, strong balance sheet quality, competitive advantages, ability to generate excess cash flows, meaningful management ownership stakes, attractive reinvestment opportunities, strong market share positions, and/or attractive relative valuation. These equity securities primarily consist of common stocks, American Depositary Receipts (“ADRs”), and real estate investment trusts (“REITs”).

Principal Risks: The greatest risk of investing in the Fund is that you could lose money. There is no assurance that the Fund will achieve its investment objective. The principal risks of investing in the Fund listed below are presented in alphabetical order and not in order of importance or potential exposure. Among other matters, this presentation is intended to facilitate your ability to find particular risks and make comparisons with those of other funds. Each risk summarized below is considered a “principal risk” of investing in the Fund, regardless of the order in which it appears.

- *Cybersecurity Risk* – The Fund and its service providers, as well as the ability of shareholders to transact with the Fund, may be negatively impacted due to operational risks arising from, among other things, human or processing errors, systems and technology disruptions or failures, or cybersecurity incidents. Cybersecurity incidents may allow unauthorized parties to gain access to or misappropriate Fund assets, shareholder data, or confidential or proprietary information, or cause the Fund or its service providers to suffer data corruption or lose operational functionality. In addition, authorized persons could inadvertently release Fund shareholder data or confidential or proprietary information stored on the Fund’s systems. It is not possible for the Fund or its service providers to identify all of the operational risks that may affect the Fund or to develop processes and controls to completely eliminate or mitigate their occurrence or effects. Portfolio companies in which the Fund invests are also exposed to various risks related to cybersecurity incidents, and the value of the Fund’s investments in such portfolio companies could be adversely impacted in the event any such cybersecurity incidents occur.

- *Equity Securities Risk* – The Fund invests in equity securities and therefore is subject to market risks and significant fluctuations in value. Equity securities are generally subordinate to an issuer’s debt in the event of liquidation or bankruptcy. The Fund’s investments in equity securities primarily consist of ADRs, common stocks, and REITs.

ADRs – Investments in ADRs are subject to certain of the risks associated with investing directly in foreign securities, such as currency fluctuations, political and economic instability, capital restrictions, less government regulation, less publicly available information, less liquidity, increased price volatility, and differences in financial reporting standards. ADRs may not accurately track the prices of the underlying foreign securities and their value may change materially at times when the U.S. markets are not open for trading. Investing in such securities may expose the Fund to additional risk.

Common Stock – The value of an issuing company’s common stock may rise or fall as a result of factors affecting the issuing company, other companies in the same industry or sector, or the financial markets overall. Common stock generally is subordinate to preferred stock upon the liquidation or bankruptcy of the issuing company.

REITs – Investments in REITs are subject to the risks associated with the real estate industry, adverse governmental actions, declines in property and real estate values, risks related to general and local economic conditions, increases in property taxes and operating expenses, overbuilding, changes in interest rates, liabilities resulting from environmental problems, and the potential failure of a REIT to qualify for federal income-tax-free “pass-through” of net income and net realized gains that are distributed to shareholders and exemption from registration as an investment company. REITs are dependent upon specialized management skills and may invest in relatively few properties, a small geographic area or a small number of property types. As a result, investments in REITs may be volatile. REITs are pooled investment vehicles with their own fees and expenses and the Fund will indirectly bear a proportionate share of those fees and expenses when investing in REITs.

- *Inflation Risk* – Higher actual or anticipated inflation may have an adverse effect on corporate profits or consumer spending or the financial markets overall and result in lower values for securities held by the Fund.
- *Investment Risk* – An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. When you sell your shares of the Fund, they could be worth less than what you paid for them. Therefore, you may lose money by investing in the Fund.
- *Market Risk* – The Fund is subject to the risk that the securities markets will move down, sometimes rapidly and unpredictably, based on overall economic conditions and other factors, which may negatively affect the Fund’s performance. Factors that affect markets in general, including geopolitical, regulatory, market and economic developments and other developments that impact specific economic sectors, industries, companies and segments of the market, could adversely impact the Fund’s investments and lead to a decline in the value of your investment in the Fund. Geopolitical and other events, including war, terrorism, economic uncertainty, trade disputes, pandemics, public health crises and related events have led, and in the future may continue to lead, to instability in world economies and markets generally. Events that have led to recent market disruptions and turbulence include the pandemic spread of the novel coronavirus known as COVID-19, the duration and full effects of which are still uncertain. In addition, policy changes by the U.S. Government, the U.S. Federal Reserve and/or foreign governments and political events within the U.S. and abroad may cause increased volatility in financial markets, affect investor and consumer confidence and adversely impact the broader financial markets and economy, perhaps suddenly and to a significant degree. Market disruptions have caused, and may continue to cause, broad changes in market value, negative public perceptions concerning these developments, and adverse investor sentiment or publicity. Changes in value may be temporary or may last for extended periods.

- *Redemption Risk* – The Fund may experience periods of significant redemptions that could cause the Fund to sell assets at inopportune times or at a loss or depressed value. Redemption risk is heightened during periods of declining or illiquid markets. Significant redemptions could hurt the Fund’s performance. The sale of assets to meet redemption requests may require the Fund to realize net capital gains, which could require the Fund to make substantial capital gains distributions to shareholders.
- *Sector Weighting Risk* – The Fund may focus its investments in particular sectors of the economy. To the extent the Fund emphasizes investments in particular sectors of the economy, the Fund will be subject to a greater degree of risks particular to those sectors. Market conditions, interest rates, and economic, regulatory, financial or geopolitical developments could significantly affect securities in particular sectors. Depending on the weightings of the Fund’s investment in particular sectors, the Fund may have increased exposure to price movements of securities in those sectors.
- *Security Selection Risk* – Securities selected by the Fund may not perform as anticipated due to a number of factors impacting the company that issued the securities or its particular industry or sector, such as poor operating or management performance, weak demand for the company’s products or services, the company’s failure to meet earnings or other operating performance expectations, financial leverage or credit deterioration, litigation or regulatory issues, or a decline in the value of the issuer’s business and assets.
- *Small Cap Companies Risk* – The Fund invests in small capitalization companies that may not have the size, resources and other assets of mid or large capitalization companies. Small capitalization companies may also have narrower commercial markets and more limited operating histories, product lines and managerial and financial resources than larger, more established companies. Small capitalization companies may be more sensitive to changes in interest rates, borrowing costs and earnings. As a result, the securities of small capitalization companies held by the Fund may be less liquid and subject to greater market risks and fluctuations in value than mid or large capitalization companies or may not correspond to changes in the stock market in general.

Performance: The bar chart and table that follow illustrate annual Fund returns for periods ended December 31. This information is intended to give you some indication of the risks of investing in the Fund by showing changes in the Fund’s performance from year to year and how the Fund’s average annual returns over time compare with those of an index reflecting a broad measure of market performance and an index of funds with similar investment objectives. The Fund’s past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Updated performance information is available on the Fund’s website at www.lkcmfunds.com or by calling the Fund toll-free at 1-800-688-LKCM.

Calendar Year Returns as of 12/31

During the period shown on the bar chart, the Fund’s best and worst quarters are shown below:

Best and Worst Quarterly Returns	
17.24%	4th quarter, 2010
-21.00%	4th quarter, 2018

Average Annual Total Returns for Periods Ended December 31, 2019

	<u>1 Year</u>	<u>5 Years</u>	<u>10 Years</u>
Return Before Taxes	22.70%	6.92%	10.80%
Return After Taxes on Distributions	21.25%	3.64%	8.43%
Return After Taxes on Distributions and Sale of Fund Shares	14.48%	4.92%	8.58%
Russell 2000® Index (reflects no deduction for fees, expenses or taxes)	25.52%	8.23%	11.83%
Lipper Small-Cap Core Funds Index (reflects no deduction for taxes)	24.80%	8.19%	11.40%

After-tax returns are calculated using the historical highest individual federal marginal income tax rates, and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your tax situation and may differ from those shown. In certain cases, the figure representing “Return After Taxes on Distributions and Sale of Fund Shares” may be higher than the other return figures for the same period. A higher after-tax return results when a capital loss occurs upon redemption and provides an assumed tax deduction that benefits the investor. In addition, the after-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements such as 401(k) plans and individual retirement accounts.

Investment Adviser: Luther King Capital Management Corporation.

Portfolio Managers:

<u>Name</u>	<u>Title</u>	<u>Experience with the Fund</u>
Steven R. Purvis, CFA	Principal, Vice President and Portfolio Manager	Since 1996
J. Luther King, Jr., CFA, CIC	Principal, President and Portfolio Manager	Since Inception in 1994
Mason D. King, CFA	Principal, Vice President, Portfolio Manager and Analyst	Since 2017

Purchase and Sale of Fund Shares: Investors may purchase, exchange or redeem Fund shares by mail (LKCM Funds, c/o U.S. Bank Global Fund Services, 615 East Michigan Street, 3rd Floor, Milwaukee, WI 53201-0701), or by telephone at 1-800-688-LKCM. Redemptions by telephone are only permitted upon previously receiving appropriate authorization. Transactions normally will only occur on days the New York Stock Exchange is scheduled to be open. Investors who wish to purchase or redeem Fund shares through a financial intermediary should contact the financial intermediary directly for information relative to the purchase or sale of Fund shares. The minimum initial amount of investment in the Fund and exchanges into the Fund from another fund in the LKCM Funds is \$2,000. Subsequent investments in the Fund for all types of accounts may be made with a minimum investment of \$1,000.

Tax Information: The Fund’s distributions are taxable to you and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account, in which case the withdrawal of your investment from the tax-deferred arrangement may be taxable.

Payments to Broker-Dealers and Other Financial Intermediaries: If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a financial adviser), the Fund and its related companies may pay the intermediary for the sale of Fund shares and/or other services. If made, these payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.

LKCM SMALL-MID CAP EQUITY FUND

Investment Objective: The Fund seeks to maximize long-term capital appreciation.

Fees and Expenses of the Fund: The following table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. The Fund does not impose any sales charges in connection with purchases and sales of Fund shares. However, you may be required to pay a commission to your financial intermediary on purchases and sales of Fund shares, which are not reflected in the tables or example below.

Shareholder Fees

(fees paid directly from your investment)

Redemption Fee (as a percentage of the amount redeemed on shares held for less than 30 days)	1.00%
--	-------

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment)

Management Fees	0.75%
Distribution and Service (12b-1) Fees	0.00%
Other Expenses	1.20%
Acquired Fund Fees and Expenses ⁽¹⁾	0.01%
Total Annual Fund Operating Expenses	1.96%
Fee Waiver and/or Expense Reimbursement ⁽²⁾	-0.95%
Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement ⁽²⁾	1.01%

⁽¹⁾ Acquired Fund Fees and Expenses are indirect fees and expenses that funds incur from investing in the shares of other investment companies, including money market funds. The Total Annual Fund Operating Expenses and Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement for the Fund differ from the Ratio of Expenses to Average Net Assets before and after expense waiver and/or reimbursement found within the “Financial Highlights” section of the Prospectus because the audited information in the “Financial Highlights” reflects the operating expenses of the Fund and does not include indirect expenses such as Acquired Fund Fees and Expenses.

⁽²⁾ Luther King Capital Management Corporation (“Adviser”), the Fund’s investment adviser, has contractually agreed to waive all or a portion of its management fee and/or reimburse the Fund through May 1, 2021 in order to limit the Fund’s Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement to 1.00% per annum (excluding any interest, taxes, brokerage commissions, indirect fees and expenses related to investments in other investment companies, including money market funds (“Acquired Fund Fees and Expenses”), and extraordinary expenses). The fee waiver and expense reimbursement agreement may be terminated or changed only with the consent of the Board of Trustees.

Example

The following example is intended to help you compare the costs of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same (except that the example reflects the fee waiver/expense reimbursement arrangement through May 1, 2021). Although your actual costs may be higher or lower, based on these assumptions, whether or not you redeem your shares, your costs would be as follows:

<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
\$103	\$523	\$969	\$2,209

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 68% of the average value of its portfolio.

Principal Investment Strategies: The Fund seeks to achieve its investment objective by investing under normal circumstances at least 80% of its net assets (plus any borrowings for investment purposes) in equity securities of small-mid capitalization companies. The Fund primarily chooses investments that the Adviser believes are likely to have above-average growth in revenue and/or earnings and potential for above-average capital appreciation. Small-mid capitalization companies are those with market capitalizations at the time of investment between \$1.25 billion and \$12 billion. The Fund is not required to sell equity securities whose market values appreciate or depreciate outside this market capitalization range. From time to time, in pursuing its investment strategies, the Fund may hold a significant percentage of its investments in specific sectors of the economy.

The Fund seeks to invest in the equity securities of high quality companies, as determined by the Adviser, that typically exhibit certain characteristics, including high profitability levels, strong balance sheet quality, competitive advantages, ability to generate excess cash flows, meaningful management ownership stakes, attractive reinvestment opportunities, strong market share positions, and/or attractive relative valuation. These equity securities primarily consist of common stocks, American Depositary Receipts (“ADRs”), and real estate investment trusts (“REITs”).

Principal Risks: The greatest risk of investing in the Fund is that you could lose money. There is no assurance that the Fund will achieve its investment objective. The principal risks of investing in the Fund listed below are presented in alphabetical order and not in order of importance or potential exposure. Among other matters, this presentation is intended to facilitate your ability to find particular risks and make comparisons with those of other funds. Each risk summarized below is considered a “principal risk” of investing in the Fund, regardless of the order in which it appears.

- *Cybersecurity Risk* – The Fund and its service providers, as well as the ability of shareholders to transact with the Fund, may be negatively impacted due to operational risks arising from, among other things, human or processing errors, systems and technology disruptions or failures, or cybersecurity incidents. Cybersecurity incidents may allow unauthorized parties to gain access to or misappropriate Fund assets, shareholder data, or confidential or proprietary information, or cause the Fund or its service providers to suffer data corruption or lose operational functionality. In addition, authorized persons could inadvertently release Fund shareholder data or confidential or proprietary information stored on the Fund’s systems. It is not possible for the Fund or its service providers to identify all of the operational risks that may affect the Fund or to develop processes and controls to completely eliminate or mitigate their occurrence or effects. Portfolio companies in which the Fund invests are also exposed to various risks related to cybersecurity incidents, and the value of the Fund’s investments in such portfolio companies could be adversely impacted in the event any such cybersecurity incidents occur.

- *Equity Securities Risk* – The Fund invests in equity securities and therefore is subject to market risks and significant fluctuations in value. Equity securities are generally subordinate to an issuer’s debt in the event of liquidation or bankruptcy. The Fund’s investments in equity securities primarily consist of ADRs, common stocks, and REITs.

ADRs – Investments in ADRs are subject to certain of the risks associated with investing directly in foreign securities, such as currency fluctuations, political and economic instability, capital restrictions, less government regulation, less publicly available information, less liquidity, increased price volatility, and differences in financial reporting standards. ADRs may not accurately track the prices of the underlying foreign securities and their value may change materially at times when the U.S. markets are not open for trading. Investing in such securities may expose the Fund to additional risk.

Common Stock – The value of an issuing company’s common stock may rise or fall as a result of factors affecting the issuing company, other companies in the same industry or sector, or the financial markets overall. Common stock generally is subordinate to preferred stock upon the liquidation or bankruptcy of the issuing company.

REITs – Investments in REITs are subject to the risks associated with the real estate industry, adverse governmental actions, declines in property and real estate values, risks related to general and local economic conditions, increases in property taxes and operating expenses, overbuilding, changes in interest rates, liabilities resulting from environmental problems, and the potential failure of a REIT to qualify for federal income-tax-free “pass-through” of net income and net realized gains that are distributed to shareholders and exemption from registration as an investment company. REITs are dependent upon specialized management skills and may invest in relatively few properties, a small geographic area or a small number of property types. As a result, investments in REITs may be volatile. REITs are pooled investment vehicles with their own fees and expenses and the Fund will indirectly bear a proportionate share of those fees and expenses when investing in REITs.

- *Inflation Risk* – Higher actual or anticipated inflation may have an adverse effect on corporate profits or consumer spending or the financial markets overall and result in lower values for securities held by the Fund.
- *Investment Risk* – An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. When you sell your shares of the Fund, they could be worth less than what you paid for them. Therefore, you may lose money by investing in the Fund.
- *Market Risk* – The Fund is subject to the risk that the securities markets will move down, sometimes rapidly and unpredictably, based on overall economic conditions and other factors, which may negatively affect the Fund’s performance. Factors that affect markets in general, including geopolitical, regulatory, market and economic developments and other developments that impact specific economic sectors, industries, companies and segments of the market, could adversely impact the Fund’s investments and lead to a decline in the value of your investment in the Fund. Geopolitical and other events, including war, terrorism, economic uncertainty, trade disputes, pandemics, public health crises and related events have led, and in the future may continue to lead, to instability in world economies and markets generally. Events that have led to recent market disruptions and turbulence include the pandemic spread of the novel coronavirus known as COVID-19, the duration and full effects of which are still uncertain. In addition, policy changes by the U.S. Government, the U.S. Federal Reserve and/or foreign governments and political events within the U.S. and abroad may cause increased volatility in financial markets, affect investor and consumer confidence and adversely impact the broader financial markets and economy, perhaps suddenly and to a significant degree. Market disruptions have caused, and may continue to cause, broad changes in market value, negative public perceptions concerning these developments, and adverse investor sentiment or publicity. Changes in value may be temporary or may last for extended periods.

- *Redemption Risk* – The Fund may experience periods of significant redemptions that could cause the Fund to sell assets at inopportune times or at a loss or depressed value. Redemption risk is heightened during periods of declining or illiquid markets. Significant redemptions could hurt the Fund’s performance. The sale of assets to meet redemption requests may require the Fund to realize net capital gains, which could require the Fund to make substantial capital gains distributions to shareholders.
- *Sector Weighting Risk* – The Fund may focus its investments in particular sectors of the economy. To the extent the Fund emphasizes investments in particular sectors of the economy, the Fund will be subject to a greater degree of risks particular to those sectors. Market conditions, interest rates, and economic, regulatory, financial or geopolitical developments could significantly affect securities in particular sectors. Depending on the weightings of the Fund’s investment in particular sectors, the Fund may have increased exposure to price movements of securities in those sectors.
- *Security Selection Risk* – Securities selected by the Fund may not perform as anticipated due to a number of factors impacting the company that issued the securities or its particular industry or sector, such as poor operating or management performance, weak demand for the company’s products or services, the company’s failure to meet earnings or other operating performance expectations, financial leverage or credit deterioration, litigation or regulatory issues, or a decline in the value of the issuer’s business and assets.
- *Small and Mid Cap Companies Risk* – The Fund invests in small and mid capitalization companies that may not have the size, resources and other assets of large capitalization companies. Small and mid capitalization companies may also have narrower commercial markets and more limited operating histories, product lines, and managerial and financial resources than larger, more established companies. Small and mid capitalization companies may be more sensitive to changes in interest rates, borrowing costs and earnings. As a result, the securities of small and mid capitalization companies held by the Fund may be less liquid and subject to greater market risks and fluctuations in value than large capitalization companies or may not correspond to changes in the stock market in general. In general, these risks are greater for small capitalization companies than for mid capitalization companies.

Performance: The bar chart and table that follow illustrate annual Fund returns for periods ended December 31. This information is intended to give you some indication of the risks of investing in the Fund by showing changes in the Fund’s performance from year to year and how the Fund’s average annual returns over time compare with those of an index reflecting a broad measure of market performance and an index of funds with similar investment objectives. The Fund’s past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Updated performance information is available on the Fund’s website at www.lkcmfunds.com or by calling the Fund toll-free at 1-800-688-LKCM.

Calendar Year Returns as of 12/31

During the period shown on the bar chart, the Fund’s best and worst quarters are shown below:

Best and Worst Quarterly Returns	
18.06%	1st quarter, 2019
-21.23%	4th quarter, 2018

Average Annual Total Returns for Periods Ended December 31, 2019

	<u>1 Year</u>	<u>5 Years</u>	<u>Since Inception (May 2, 2011)</u>
Return Before Taxes	31.05%	8.13%	7.24%
Return After Taxes on Distributions	27.18%	4.89%	5.30%
Return After Taxes on Distributions and Sale of Fund Shares	21.17%	5.88%	5.50%
Russell 2500® Index (reflects no deduction for fees, expenses or taxes)	27.77%	8.93%	10.12%
Lipper Small-Cap Core Funds Index (reflects no deduction for taxes)	24.80%	8.19%	9.07%

After-tax returns are calculated using the historical highest individual federal marginal income tax rates, and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your tax situation and may differ from those shown. In certain cases, the figure representing “Return After Taxes on Distributions and Sale of Fund Shares” may be higher than the other return figures for the same period. A higher after-tax return results when a capital loss occurs upon redemption and provides an assumed tax deduction that benefits the investor. In addition, the after-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements such as 401(k) plans and individual retirement accounts.

Investment Adviser: Luther King Capital Management Corporation.

Portfolio Managers:

<u>Name</u>	<u>Title</u>	<u>Experience with the Fund</u>
Steven R. Purvis, CFA	Principal, Vice President and Portfolio Manager	Since Inception in 2011
J. Luther King, Jr., CFA, CIC	Principal, President and Portfolio Manager	Since Inception in 2011
Mason D. King, CFA	Principal, Vice President, Portfolio Manager and Analyst	Since 2017

Purchase and Sale of Fund Shares: Investors may purchase, exchange or redeem Fund shares by mail (LKCM Funds, c/o U.S. Bank Global Fund Services, 615 East Michigan Street, 3rd Floor, Milwaukee, WI 53201-0701), or by telephone at 1-800-688-LKCM. Redemptions by telephone are only permitted upon previously receiving appropriate authorization. Transactions normally will only occur on days the New York Stock Exchange is scheduled to be open. Investors who wish to purchase or redeem Fund shares through a financial intermediary should contact the financial intermediary directly for information relative to the purchase or sale of Fund shares. The minimum initial amount of investment in the Fund and exchanges into the Fund from another fund in the LKCM Funds is \$2,000. Subsequent investments in the Fund for all types of accounts may be made with a minimum investment of \$1,000.

Tax Information: The Fund’s distributions are taxable to you and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account, in which case the withdrawal of your investment from the tax-deferred arrangement may be taxable.

Payments to Broker-Dealers and Other Financial Intermediaries: If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a financial adviser), the Fund and its related companies may pay the intermediary for the sale of Fund shares and/or other services. If made, these payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.

LKCM EQUITY FUND

Investment Objective: The Fund seeks to maximize long-term capital appreciation.

Fees and Expenses of the Fund: The following table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. The Fund does not impose any sales charges in connection with purchases and sales of Fund shares. However, you may be required to pay a commission to your financial intermediary on purchases and sales of Fund shares, which are not reflected in the tables or example below.

Shareholder Fees

(fees paid directly from your investment)

Redemption Fee (as a percentage of the amount redeemed on shares held for less than 30 days)	1.00%
--	-------

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment)

Management Fees	0.70%
Distribution and Service (12b-1) Fees	0.00%
Other Expenses	0.29%
Total Annual Fund Operating Expenses	0.99%
Fee Waiver and/or Expense Reimbursement ⁽¹⁾	-0.19%
Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement ⁽¹⁾	0.80%

⁽¹⁾ Luther King Capital Management Corporation (“Adviser”), the Fund’s investment adviser, has contractually agreed to waive all or a portion of its management fee and/or reimburse the Fund through May 1, 2021 in order to limit the Fund’s Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement to 0.80% per annum (excluding any interest, taxes, brokerage commissions, indirect fees and expenses relating to investments in other investment companies, including money market funds (“Acquired Fund Fees and Expenses”), and extraordinary expenses). The fee waiver and expense reimbursement agreement may be terminated or changed only with the consent of the Board of Trustees.

Example

The following example is intended to help you compare the costs of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same (except that the example reflects the fee waiver/expense reimbursement arrangement through May 1, 2021). Although your actual costs may be higher or lower, based on these assumptions, whether or not you redeem your shares, your costs would be as follows:

<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
\$82	\$296	\$529	\$1,196

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 9% of the average value of its portfolio.

Principal Investment Strategies: The Fund seeks to achieve its investment objective by investing under normal circumstances at least 80% of its net assets (plus any borrowings for investment purposes) in equity securities. The Fund primarily invests in companies that the Adviser believes are likely to have above-average growth in revenue and/or earnings, above-average returns on shareholders’ equity, potential for above-average capital appreciation, and/or companies that the Adviser believes have attractive relative valuations. The Fund may invest in equity securities of small, mid and large capitalization companies, including dividend paying securities. From time to time, in pursuing its investment strategies, the Fund may hold a significant percentage of its investments in specific sectors of the economy.

The Fund seeks to invest in the equity securities of high quality companies, as determined by the Adviser, that typically exhibit certain characteristics, including high profitability levels, strong balance sheet quality, competitive advantages, ability to generate excess cash flows, meaningful management ownership stakes, attractive reinvestment opportunities and/or strong market share positions. These equity securities primarily consist of common stocks, American Depositary Receipts (“ADRs”), and real estate investment trusts (“REITs”).

Principal Risks: The greatest risk of investing in the Fund is that you could lose money. There is no assurance that the Fund will achieve its investment objective. The principal risks of investing in the Fund listed below are presented in alphabetical order and not in order of importance or potential exposure. Among other matters, this presentation is intended to facilitate your ability to find particular risks and make comparisons with those of other funds. Each risk summarized below is considered a “principal risk” of investing in the Fund, regardless of the order in which it appears.

- *Cybersecurity Risk* – The Fund and its service providers, as well as the ability of shareholders to transact with the Fund, may be negatively impacted due to operational risks arising from, among other things, human or processing errors, systems and technology disruptions or failures, or cybersecurity incidents. Cybersecurity incidents may allow unauthorized parties to gain access to or misappropriate Fund assets, shareholder data, or confidential or proprietary information, or cause the Fund or its service providers to suffer data corruption or lose operational functionality. In addition, authorized persons could inadvertently release Fund shareholder data or confidential or proprietary information stored on the Fund’s systems. It is not possible for the Fund or its service providers to identify all of the operational risks that may affect the Fund or to develop processes and controls to completely eliminate or mitigate their occurrence or effects. Portfolio companies in which the Fund invests are also exposed to various risks related to cybersecurity incidents, and the value of the Fund’s investments in such portfolio companies could be adversely impacted in the event any such cybersecurity incidents occur.
- *Dividend Paying Securities Risk* – Securities that pay higher dividends as a group can fall out of favor with the market, causing these companies to underperform companies that do not pay high or any dividends. Also, changes in the dividend policies of companies owned by the Fund and the capital resources available for these companies’ dividend payments may reduce the level of dividend payments and adversely affect the Fund.
- *Equity Securities Risk* – The Fund invests in equity securities and therefore is subject to market risks and significant fluctuations in value. Equity securities are generally subordinate to an issuer’s debt in the event of liquidation or bankruptcy. The Fund’s investments in equity securities primarily consist of ADRs, common stocks, and REITs.

ADRs – Investments in ADRs are subject to certain of the risks associated with investing directly in foreign securities, such as currency fluctuations, political and economic instability, capital restrictions, less government regulation, less publicly available information, less liquidity, increased price volatility, and differences in financial reporting standards. ADRs may not accurately track the prices of the underlying foreign securities and their value may change materially at times when the U.S. markets are not open for trading. Investing in such securities may expose the Fund to additional risk.

Common Stock – The value of an issuing company’s common stock may rise or fall as a result of factors affecting the issuing company, other companies in the same industry or sector, or the financial markets overall. Common stock generally is subordinate to preferred stock upon the liquidation or bankruptcy of the issuing company.

REITs – Investments in REITs are subject to the risks associated with the real estate industry, adverse governmental actions, declines in property and real estate values, risks related to general and local economic conditions, increases in property taxes and operating expenses, overbuilding, changes in interest rates, liabilities resulting from environmental problems, and the potential failure of a REIT to qualify for federal income-tax-free “pass-through” of net income and net realized gains that are distributed to shareholders and exemption from registration as an investment company. REITs are dependent upon specialized management skills and may invest in relatively few properties, a small geographic area or a small number of property types. As a result, investments in REITs may be volatile. REITs are pooled investment vehicles with their own fees and expenses and the Fund will indirectly bear a proportionate share of those fees and expenses when investing in REITs.

- *Inflation Risk* – Higher actual or anticipated inflation may have an adverse effect on corporate profits or consumer spending or the financial markets overall and result in lower values for securities held by the Fund.
- *Investment Risk* – An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. When you sell your shares of the Fund, they could be worth less than what you paid for them. Therefore, you may lose money by investing in the Fund.
- *Large Cap Companies Risk* – The securities of large market capitalization companies may underperform other segments of the market because such companies may be less responsive to competitive challenges and opportunities and may be unable to attain or maintain high growth rates during periods of economic expansion.
- *Market Risk* – The Fund is subject to the risk that the securities markets will move down, sometimes rapidly and unpredictably, based on overall economic conditions and other factors, which may negatively affect the Fund’s performance. Factors that affect markets in general, including geopolitical, regulatory, market and economic developments and other developments that impact specific economic sectors, industries, companies and segments of the market, could adversely impact the Fund’s investments and lead to a decline in the value of your investment in the Fund. Geopolitical and other events, including war, terrorism, economic uncertainty, trade disputes, pandemics, public health crises and related events have led, and in the future may continue to lead, to instability in world economies and markets generally. Events that have led to recent

market disruptions and turbulence include the pandemic spread of the novel coronavirus known as COVID-19, the duration and full effects of which are still uncertain. In addition, policy changes by the U.S. Government, the U.S. Federal Reserve and/or foreign governments and political events within the U.S. and abroad may cause increased volatility in financial markets, affect investor and consumer confidence and adversely impact the broader financial markets and economy, perhaps suddenly and to a significant degree. Market disruptions have caused, and may continue to cause, broad changes in market value, negative public perceptions concerning these developments, and adverse investor sentiment or publicity. Changes in value may be temporary or may last for extended periods.

- **Redemption Risk** – The Fund may experience periods of significant redemptions that could cause the Fund to sell assets at inopportune times or at a loss or depressed value. Redemption risk is heightened during periods of declining or illiquid markets. Significant redemptions could hurt the Fund’s performance. The sale of assets to meet redemption requests may require the Fund to realize net capital gains, which could require the Fund to make substantial capital gains distributions to shareholders.
- **Sector Weighting Risk** – The Fund may focus its investments in particular sectors of the economy. To the extent the Fund emphasizes investments in particular sectors of the economy, the Fund will be subject to a greater degree of risks particular to those sectors. Market conditions, interest rates, and economic, regulatory, financial or geopolitical developments could significantly affect securities in particular sectors. Depending on the weightings of the Fund’s investment in particular sectors, the Fund may have increased exposure to price movements of securities in those sectors.
- **Security Selection Risk** – Securities selected by the Fund may not perform as anticipated due to a number of factors impacting the company that issued the securities or its particular industry or sector, such as poor operating or management performance, weak demand for the company’s products or services, the company’s failure to meet earnings or other operating performance expectations, financial leverage or credit deterioration, litigation or regulatory issues, or a decline in the value of the issuer’s business and assets.
- **Small and Mid Cap Companies Risk** – The Fund invests in small and mid capitalization companies that may not have the size, resources and other assets of large capitalization companies. Small and mid capitalization companies may also have narrower commercial markets and more limited operating histories, product lines, and managerial and financial resources than larger, more established companies. Small and mid capitalization companies may be more sensitive to changes in interest rates, borrowing costs and earnings. As a result, the securities of small and mid capitalization companies held by the Fund may be less liquid and subject to greater market risks and fluctuations in value than large capitalization companies or may not correspond to changes in the stock market in general. In general, these risks are greater for small capitalization companies than for mid capitalization companies.

Performance: The bar chart and table that follow illustrate annual Fund returns for periods ended December 31. This information is intended to give you some indication of the risks of investing in the Fund by showing changes in the Fund’s performance from year to year and how the Fund’s average annual returns over time compare with those of an index reflecting a broad measure of market performance and an index of funds with similar investment objectives. The Fund’s past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Updated performance information is available on the Fund’s website at www.lkcmfunds.com or by calling the Fund toll-free at 1-800-688-LKCM.

Calendar Year Returns as of 12/31

During the period shown on the bar chart, the Fund’s best and worst quarters are shown below:

Best and Worst Quarterly Returns

14.78% 1st quarter, 2019
 -14.51% 3rd quarter, 2011

Average Annual Total Returns for Periods Ended December 31, 2019

	<u>1 Year</u>	<u>5 Years</u>	<u>10 Years</u>
Return Before Taxes	29.85%	10.48%	12.41%
Return After Taxes on Distributions	28.54%	9.16%	11.49%
Return After Taxes on Distributions and Sale of Fund Shares	18.61%	8.08%	10.19%
S&P 500® Index (reflects no deduction for fees, expenses or taxes)	31.49%	11.70%	13.56%
Lipper Large-Cap Core Funds Index (reflects no deduction for taxes)	29.00%	10.54%	12.17%

After-tax returns are calculated using the historical highest individual federal marginal income tax rates, and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your tax situation and may differ from those shown. In certain cases, the figure representing “Return After Taxes on Distributions and Sale of Fund Shares” may be higher than the other return figures for the same period. A higher after-tax return results when a capital loss occurs upon redemption and provides an assumed tax deduction that benefits the investor. In addition, the after-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements such as 401(k) plans and individual retirement accounts.

Investment Adviser: Luther King Capital Management Corporation.

Portfolio Managers:

<u>Name</u>	<u>Title</u>	<u>Experience with the Fund</u>
J. Luther King, Jr., CFA, CIC	Principal, President and Portfolio Manager	Since Inception in 1996
Scot C. Hollmann, CFA, CIC	Principal, Vice President and Portfolio Manager	Since 2010
Mason D. King, CFA	Principal, Vice President, Portfolio Manager and Analyst	Since 2010

Purchase and Sale of Fund Shares: Investors may purchase, exchange or redeem Fund shares by mail (LKCM Funds, c/o U.S. Bank Global Fund Services, 615 East Michigan Street, 3rd Floor, Milwaukee, WI 53201-0701), or by telephone at 1-800-688-LKCM. Redemptions by telephone are only permitted upon previously receiving appropriate authorization. Transactions normally will only occur on days the New York Stock Exchange is scheduled to be open. Investors who wish to purchase or redeem Fund shares through a financial intermediary should contact the financial intermediary directly for information relative to the purchase or sale of Fund shares. The minimum initial amount of investment in the Fund and exchanges into the Fund from another fund in the LKCM Funds is \$2,000. Subsequent investments in the Fund for all types of accounts may be made with a minimum investment of \$1,000.

Tax Information: The Fund’s distributions are taxable to you and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account, in which case the withdrawal of your investment from the tax-deferred arrangement may be taxable.

Payments to Broker-Dealers and Other Financial Intermediaries: If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a financial adviser), the Fund and its related companies may pay the intermediary for the sale of Fund shares and/or other services. If made, these payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.

LKCM BALANCED FUND

Investment Objective: The Fund seeks current income and long-term capital appreciation.

Fees and Expenses of the Fund: The following table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. The Fund does not impose any sales charges in connection with purchases and sales of Fund shares. However, you may be required to pay a commission to your financial intermediary on purchases and sales of Fund shares, which are not reflected in the tables or example below.

Shareholder Fees

(fees paid directly from your investment)

Redemption Fee (as a percentage of the amount redeemed on shares held for less than 30 days)	1.00%
--	-------

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment)

Management Fees	0.65%
Distribution and Service (12b-1) Fees	0.00%
Other Expenses	0.35%
Total Annual Fund Operating Expenses	1.00%
Fee Waiver and/or Expense Reimbursement ⁽¹⁾	-0.20%
Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement ⁽¹⁾	0.80%

⁽¹⁾ Luther King Capital Management Corporation (“Adviser”), the Fund’s investment adviser, has contractually agreed to waive all or a portion of its management fee and/or reimburse the Fund through May 1, 2021 in order to limit the Fund’s Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement to 0.80% per annum (excluding any interest, taxes, brokerage commissions, indirect fees and expenses relating to investments in other investment companies, including money market funds (“Acquired Fund Fees and Expenses”), and extraordinary expenses). The fee waiver and expense reimbursement agreement may be terminated or changed only with the consent of the Board of Trustees.

Example

The following example is intended to help you compare the costs of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same (except that the example reflects the fee waiver/expense reimbursement arrangement through May 1, 2021). Although your actual costs may be higher or lower, based on these assumptions, whether or not you redeem your shares, your costs would be as follows:

<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
\$82	\$298	\$533	\$1,206

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 17% of the average value of its portfolio.

Principal Investment Strategies: The Fund seeks to achieve its investment objective by investing primarily in a portfolio of equity and fixed income securities. The Fund may invest in securities of small, mid and large capitalization companies, including dividend paying securities. The Fund seeks to invest in the equity securities of high quality companies, as determined by the Adviser, that typically exhibit certain characteristics, including high profitability levels, strong balance sheet quality, competitive advantages, ability to generate excess cash flows, meaningful management ownership stakes, attractive reinvestment opportunities, strong market share positions, and/or attractive relative valuation. These equity securities primarily consist of common stocks, American Depositary Receipts (“ADRs”), and real estate investment trusts (“REITs”). The Fund does not presently intend to invest more than 20% of its total assets in equity securities that do not pay dividends.

The Fund’s investments in fixed income securities consist primarily of investment grade corporate fixed income securities and fixed income securities issued or guaranteed by the U.S. Government, its agencies or instrumentalities. The Fund typically invests in fixed income securities with short- to intermediate-term maturities from one to ten years. Under normal circumstances, 25% or more of the Fund’s total assets consist of fixed income securities. Investment grade debt securities are considered to be those rated within the four highest rating categories by a nationally recognized statistical rating organization, such as Moody’s Investors Service, Inc., Fitch Ratings, Inc. or S&P Global Ratings, or of equivalent quality as determined by the Adviser.

In determining whether or not to invest in a particular debt security, the Adviser considers factors such as the price, coupon, yield to maturity, the credit quality of the issuer, the issuer’s cash flow and related coverage ratios, the property, if any, securing the obligation and the terms of the security, including subordination, default, sinking fund and early redemption provisions. If securities held by the

Fund are downgraded below investment grade, the Adviser will consider whether to continue to hold the securities. From time to time, in pursuing its investment strategies, the Fund may hold a significant percentage of its investments in specific sectors of the economy.

Principal Risks: The greatest risk of investing in the Fund is that you could lose money. There is no assurance that the Fund will achieve its investment objective. The principal risks of investing in the Fund listed below are presented in alphabetical order and not in order of importance or potential exposure. Among other matters, this presentation is intended to facilitate your ability to find particular risks and make comparisons with those of other funds. Each risk summarized below is considered a “principal risk” of investing in the Fund, regardless of the order in which it appears.

- *Call Risk* – During periods of falling interest rates, an issuer of a callable bond held by the Fund may “call” or repay the security before its stated maturity, and the Fund may have to reinvest the proceeds at lower interest rates, resulting in a decline in the Fund’s income.
- *Credit Risk* – The Fund is subject to the risk that the issuer or guarantor of a fixed income security becomes unable or unwilling, or is perceived as unable or unwilling, to make timely interest or principal payments or otherwise honor its obligations, which may cause the Fund’s holdings to lose value. A decline in the credit rating of an individual security held by the Fund may have an adverse impact on its price. The credit quality of a security can deteriorate suddenly and rapidly. Lower credit quality also may lead to greater volatility in the price of a security and may negatively affect a security’s liquidity. Credit risk is typically greater for securities with ratings that are downgraded below investment grade.
- *Cybersecurity Risk* – The Fund and its service providers, as well as the ability of shareholders to transact with the Fund, may be negatively impacted due to operational risks arising from, among other things, human or processing errors, systems and technology disruptions or failures, or cybersecurity incidents. Cybersecurity incidents may allow unauthorized parties to gain access to or misappropriate Fund assets, shareholder data, or confidential or proprietary information, or cause the Fund or its service providers to suffer data corruption or lose operational functionality. In addition, authorized persons could inadvertently release Fund shareholder data or confidential or proprietary information stored on the Fund’s systems. It is not possible for the Fund or its service providers to identify all of the operational risks that may affect the Fund or to develop processes and controls to completely eliminate or mitigate their occurrence or effects. Portfolio companies in which the Fund invests are also exposed to various risks related to cybersecurity incidents, and the value of the Fund’s investments in such portfolio companies could be adversely impacted in the event any such cybersecurity incidents occur.
- *Dividend Paying Securities Risk* – Securities that pay higher dividends as a group can fall out of favor with the market, causing these companies to underperform companies that do not pay high or any dividends. Also, changes in the dividend policies of companies owned by the Fund and the capital resources available for these companies’ dividend payments may reduce the level of dividend payments and adversely affect the Fund.
- *Equity Securities Risk* – The Fund invests in equity securities and therefore is subject to market risks and significant fluctuations in value. Equity securities are generally subordinate to an issuer’s debt in the event of liquidation or bankruptcy. The Fund’s investments in equity securities primarily consist of ADRs, common stocks, and REITs.

ADRs – Investments in ADRs are subject to certain of the risks associated with investing directly in foreign securities, such as currency fluctuations, political and economic instability, capital restrictions, less government regulation, less publicly available information, less liquidity, increased price volatility, and differences in financial reporting standards. ADRs may not accurately track the prices of the underlying foreign securities and their value may change materially at times when the U.S. markets are not open for trading. Investing in such securities may expose the Fund to additional risk.

Common Stock – The value of an issuing company’s common stock may rise or fall as a result of factors affecting the issuing company, other companies in the same industry or sector, or the financial markets overall. Common stock generally is subordinate to preferred stock upon the liquidation or bankruptcy of the issuing company.

REITs – Investments in REITs are subject to the risks associated with the real estate industry, adverse governmental actions, declines in property and real estate values, risks related to general and local economic conditions, increases in property taxes and operating expenses, overbuilding, changes in interest rates, liabilities resulting from environmental problems, and the potential failure of a REIT to qualify for federal income-tax-free “pass-through” of net income and net realized gains that are distributed to shareholders and exemption from registration as an investment company. REITs are dependent upon specialized management skills and may invest in relatively few properties, a small geographic area or a small number of property types. As a result, investments in REITs may be volatile. REITs are pooled investment vehicles with their own fees and expenses and the Fund will indirectly bear a proportionate share of those fees and expenses when investing in REITs.

- *Fixed Income Securities Risk* – The Fund invests in fixed income securities and is therefore subject to the risk that the prices of, and the income generated by, fixed income securities held by the Fund may decline significantly and/or rapidly in response to adverse issuer, geopolitical, regulatory, general economic and market conditions, or other developments, such as regional or global economic instability (including terrorism, pandemic and related geopolitical risks), interest rate fluctuations, and those

events directly involving the issuers that may cause broad changes in market value, public perceptions concerning these developments, and adverse investor sentiment.

- *Foreign Securities Risk* – Non-U.S. investments carry potential risks not associated with domestic investments. Such risks include, but are not limited to: currency exchange rate fluctuations, political and financial instability, less liquidity and greater volatility of foreign investments, lack of uniform accounting, auditing and financing reporting standards, different government regulation and supervision of foreign banks, stock exchanges, brokers and listed companies, and delays in transaction settlement in some foreign markets. There may be very limited oversight of certain foreign banks or securities depositories that hold foreign securities and currency and the laws of certain countries may limit the ability to recover such assets if a foreign bank or depository or their agents goes bankrupt.
- *Inflation Risk* – Higher actual or anticipated inflation may have an adverse effect on corporate profits or consumer spending or the financial markets overall and result in lower values for securities held by the Fund.
- *Interest Rate Risk* – Changes in interest rates may affect the yield, liquidity and value of investments in income producing or debt securities. Market values of fixed income securities generally are inversely related to actual changes in interest rates – generally, when interest rates rise, the value of the Fund’s debt securities declines and when interest rates decline, the value of the Fund’s debt securities rises. As of the date of this prospectus, interest rates are historically low. In the future, interest rates may increase, significantly or rapidly, which could result in significant losses to the Fund. Typically, the longer the maturity or duration of a debt security, the greater the effect a change in interest rates could have on the security’s price. Generally, a bond with a longer maturity or duration will entail greater interest rate risk. Conversely, a bond with a shorter maturity or duration will generally entail less interest rate risk. A bond’s value may also be affected by changes in its credit rating or the issuer’s financial condition.
- *Investment Risk* – An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. When you sell your shares of the Fund, they could be worth less than what you paid for them. Therefore, you may lose money by investing in the Fund.
- *Large Cap Companies Risk* – The securities of large market capitalization companies may underperform other segments of the market because such companies may be less responsive to competitive challenges and opportunities and may be unable to attain or maintain high growth rates during periods of economic expansion.
- *LIBOR Transition Risk* – The Fund may invest in securities or derivatives that use the London Interbank Offered Rate (“LIBOR” or “ICE LIBOR”) as a benchmark or reference rate for interest rate calculations. Plans are underway to phase out the use of LIBOR by the end of 2021. There remains uncertainty regarding the nature of any replacement rate and the impact of the transition from LIBOR on the Funds and the financial markets generally. The transition process, or the failure of an industry to transition, could lead to increased volatility and illiquidity in markets for instruments that currently rely on LIBOR to determine interest rates and a reduction in the values of some LIBOR-based investments, all of which would impact the Fund.
- *Liquidity Risk* – When there is little or no active trading market for specific types of securities, it can become more difficult for the Fund to sell securities at favorable times or prices. As a result, the Fund may have to lower the price on certain securities that it is trying to sell, sell other securities instead or forego an investment opportunity, any of which could have a negative effect on the Fund. Market developments may cause the Fund’s investments to become less liquid or illiquid and subject to erratic price movements. Certain investments that were liquid when purchased may become illiquid, sometimes abruptly, particularly in times of overall economic distress or adverse investor perception. A reduction in the ability or willingness of dealers and other institutional investors to make a market in certain securities may result in decreased liquidity in certain markets. Significant securities market disruptions related to outbreaks of COVID-19 have led to dislocation in the market for a variety of fixed income securities (including, but not limited to, commercial paper, corporate debt securities, certificates of deposit, asset-backed debt securities and municipal obligations), which has decreased liquidity and sharply reduced returns of certain fixed income securities.
- *Market Risk* – The Fund is subject to the risk that the securities markets will move down, sometimes rapidly and unpredictably, based on overall economic conditions and other factors, which may negatively affect the Fund’s performance. Factors that affect markets in general, including geopolitical, regulatory, market and economic developments and other developments that impact specific economic sectors, industries, companies and segments of the market, could adversely impact the Fund’s investments and lead to a decline in the value of your investment in the Fund. Geopolitical and other events, including war, terrorism, economic uncertainty, trade disputes, pandemics, public health crises and related events have led, and in the future may continue to lead, to instability in world economies and markets generally. Events that have led to recent market disruptions and turbulence include the pandemic spread of the novel coronavirus known as COVID-19, the duration and full effects of which are still uncertain. In addition, policy changes by the U.S. Government, the U.S. Federal Reserve and/or foreign governments and political events within the U.S. and abroad may cause increased volatility in financial markets, affect investor and consumer confidence and adversely impact the broader financial markets and economy, perhaps suddenly

and to a significant degree. Market disruptions have caused, and may continue to cause, broad changes in market value, negative public perceptions concerning these developments, and adverse investor sentiment or publicity. Changes in value may be temporary or may last for extended periods.

- *Redemption Risk* – The Fund may experience periods of significant redemptions that could cause the Fund to sell assets at inopportune times or at a loss or depressed value. Redemption risk is heightened during periods of declining or illiquid markets. Significant redemptions could hurt the Fund’s performance. The sale of assets to meet redemption requests may require the Fund to realize net capital gains, which could require the Fund to make substantial capital gains distributions to shareholders.
- *Sector Weighting Risk* – The Fund may focus its investments in particular sectors of the economy. To the extent the Fund emphasizes investments in particular sectors of the economy, the Fund will be subject to a greater degree of risks particular to those sectors. Market conditions, interest rates, and economic, regulatory, financial or geopolitical developments could significantly affect securities in particular sectors. Depending on the weightings of the Fund’s investment in particular sectors, the Fund may have increased exposure to price movements of securities in those sectors.
- *Security Selection Risk* – Securities selected by the Fund may not perform as anticipated due to a number of factors impacting the company that issued the securities or its particular industry or sector, such as poor operating or management performance, weak demand for the company’s products or services, the company’s failure to meet earnings or other operating performance expectations, financial leverage or credit deterioration, litigation or regulatory issues, or a decline in the value of the issuer’s business and assets.
- *Small and Mid Cap Companies Risk* – The Fund invests in small and mid capitalization companies that may not have the size, resources and other assets of large capitalization companies. Small and mid capitalization companies may also have narrower commercial markets and more limited operating histories, product lines, and managerial and financial resources than larger, more established companies. Small and mid capitalization companies may be more sensitive to changes in interest rates, borrowing costs and earnings. As a result, the securities of small and mid capitalization companies held by the Fund may be less liquid and subject to greater market risks and fluctuations in value than large capitalization companies or may not correspond to changes in the stock market in general. In general, these risks are greater for small capitalization companies than for mid capitalization companies.
- *U.S. Government Securities Risk* – A security backed by the U.S. Treasury or the full faith and credit of the United States is guaranteed only by the applicable entity as to the timely payment of interest and principal when held to maturity. Notwithstanding that a security may be backed by the full faith and credit of the U.S. Government, circumstances could arise that would prevent the payment of interest or principal. Any guarantee by the U.S. government or its agencies or instrumentalities of a security the Fund holds does not apply to the market value of the security or the shares of the Fund. Like all fixed income securities, U.S. Government fixed income securities are also subject to market risk, credit risk and interest rate risk.

Performance: The bar chart and table that follow illustrate annual Fund returns for periods ended December 31. This information is intended to give you some indication of the risks of investing in the Fund by showing changes in the Fund’s performance from year to year and how the Fund’s average annual returns over time compare with those of an index reflecting a broad measure of market performance, an index that tracks the performance of fixed income securities, and an index of funds with similar investment objectives. The Fund’s past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Updated performance information is available on the Fund’s website at www.lkcmfunds.com or by calling the Fund toll-free at 1-800-688-LKCM.

Calendar Year Returns as of 12/31

During the period shown on the bar chart, the Fund’s best and worst quarters are shown below:

Best and Worst Quarterly Returns

10.03% 1st quarter, 2019
 -9.74% 3rd quarter, 2011

Average Annual Total Returns for Periods Ended December 31, 2019

	<u>1 Year</u>	<u>5 Years</u>	<u>10 Years</u>
Return Before Taxes	21.85%	8.30%	9.52%
Return After Taxes on Distributions	20.20%	7.22%	8.80%
Return After Taxes on Distributions and Sale of Fund Shares	14.10%	6.40%	7.73%
S&P 500® Index (reflects no deduction for fees, expenses or taxes)	31.49%	11.70%	13.56%
Bloomberg Barclays U.S. Intermediate Government/Credit Bond Index (reflects no deduction for fees, expenses or taxes)	6.80%	2.57%	3.05%
Lipper Mixed-Asset Target Allocation Growth Funds Index (reflects no deduction for taxes)	21.10%	7.25%	8.80%

After-tax returns are calculated using the historical highest individual federal marginal income tax rates, and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your tax situation and may differ from those shown. In certain cases, the figure representing “Return After Taxes on Distributions and Sale of Fund Shares” may be higher than the other return figures for the same period. A higher after-tax return results when a capital loss occurs upon redemption and provides an assumed tax deduction that benefits the investor. In addition, the after-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements such as 401(k) plans and individual retirement accounts.

Investment Adviser: Luther King Capital Management Corporation.

Portfolio Managers:

<u>Name</u>	<u>Title</u>	<u>Experience with the Fund</u>
Scot C. Hollmann, CFA, CIC	Principal, Vice President and Portfolio Manager	Since Inception in 1997
J. Luther King, Jr., CFA, CIC	Principal, President and Portfolio Manager	Since Inception in 1997
Mark L. Johnson, CFA, CIC	Principal, Vice President and Portfolio Manager	Since 2010

Purchase and Sale of Fund Shares: Investors may purchase, exchange or redeem Fund shares by mail (LKCM Funds, c/o U.S. Bank Global Fund Services, 615 East Michigan Street, 3rd Floor, Milwaukee, WI 53201-0701), or by telephone at 1-800-688-LKCM. Redemptions by telephone are only permitted upon previously receiving appropriate authorization. Transactions normally will only occur on days the New York Stock Exchange is scheduled to be open. Investors who wish to purchase or redeem Fund shares through a financial intermediary should contact the financial intermediary directly for information relative to the purchase or sale of Fund shares. The minimum initial amount of investment in the Fund and exchanges into the Fund from another fund in the LKCM Funds is \$2,000. Subsequent investments in the Fund for all types of accounts may be made with a minimum investment of \$1,000.

Tax Information: The Fund’s distributions are taxable to you and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account, in which case the withdrawal of your investment from the tax-deferred arrangement may be taxable.

Payments to Broker-Dealers and Other Financial Intermediaries: If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a financial adviser), the Fund and its related companies may pay the intermediary for the sale of Fund shares and/or other services. If made, these payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.

LKCM FIXED INCOME FUND

Investment Objective: The Fund seeks current income.

Fees and Expenses of the Fund: The following table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. The Fund does not impose any sales charges in connection with purchases and sales of Fund shares. However, you may be required to pay a commission to your financial intermediary on purchases and sales of Fund shares, which are not reflected in the tables or example below.

Shareholder Fees

(fees paid directly from your investment)

Redemption Fee (as a percentage of the amount redeemed on shares held for less than 30 days)	1.00%
--	-------

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment)

Management Fees	0.50%
Distribution and Service (12b-1) Fees	0.00%
Other Expenses	0.29%
Total Annual Fund Operating Expenses	0.79%
Fee Waiver and/or Expense Reimbursement ⁽¹⁾	-0.29%
Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement ⁽¹⁾	0.50%

⁽¹⁾ Luther King Capital Management Corporation (“Adviser”), the Fund’s investment adviser, has contractually agreed to waive all or a portion of its management fee and/or reimburse the Fund through May 1, 2021 in order to limit the Fund’s Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement to 0.50% per annum (excluding any interest, taxes, brokerage commissions, indirect fees and expenses relating to investments in other investment companies, including money market funds (“Acquired Fund Fees and Expenses”), and extraordinary expenses). The fee waiver and expense reimbursement agreement may be terminated or changed only with the consent of the Board of Trustees.

Example

The following example is intended to help you compare the costs of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same (except that the example reflects the fee waiver/expense reimbursement arrangement through May 1, 2021). Although your actual costs may be higher or lower, based on these assumptions, whether or not you redeem your shares, your costs would be as follows:

<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
\$51	\$223	\$410	\$951

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 37% of the average value of its portfolio.

Principal Investment Strategies: The Fund seeks to achieve its investment objective by investing under normal circumstances at least 80% of its net assets (plus any borrowings for investment purposes) in a portfolio of investment grade corporate and U.S. Government fixed income securities. The Fund’s investments in fixed income securities consist primarily of investment grade corporate fixed income securities and fixed income securities issued or guaranteed by the U.S. Government, its agencies or instrumentalities. The Fund typically invests in fixed income securities with short- to intermediate-term maturities from one to ten years. Investment grade debt securities are considered to be those rated within the four highest rating categories assigned by a nationally recognized statistical rating organization, such as Moody’s Investors Services, Inc., Fitch Ratings, Inc., or S&P Global Ratings, or of equivalent quality as determined by the Adviser.

The Fund seeks to maintain an average effective maturity of its portfolio between three and ten years under normal market and economic conditions. The effective maturity of securities with sinking fund or other early redemption features will be estimated by the Adviser, based upon prevailing interest rate trends and the issuer’s financial position. The average effective maturity of the Fund’s portfolio may be less than three years if the Adviser believes a defensive posture is appropriate.

The Fund may invest in all types of domestic or U.S. dollar-denominated foreign fixed income securities in any proportion, including bonds, notes, convertible bonds, mortgage pass-through securities, government and government agency securities, variable and floating rate bonds, preferred stock and short-term obligations such as commercial paper and notes, and other financial obligations. In determining whether or not to invest in a particular debt security, the Adviser considers factors such as the price, coupon, yield to maturity, the credit quality of the issuer, the issuer’s cash flow and related coverage ratios, the property, if any, securing the obligation

and the terms of the security, including subordination, default, sinking fund and early redemption provisions. If securities held by the Fund are downgraded below investment grade, the Adviser will consider whether to continue to hold the securities. From time to time, in pursuing its investment strategies, the Fund may hold a significant percentage of its investments in specific sectors of the economy.

Principal Risks: The greatest risk of investing in the Fund is that you could lose money. There is no assurance that the Fund will achieve its investment objective. The principal risks of investing in the Fund listed below are presented in alphabetical order and not in order of importance or potential exposure. Among other matters, this presentation is intended to facilitate your ability to find particular risks and make comparisons with those of other funds. Each risk summarized below is considered a “principal risk” of investing in the Fund, regardless of the order in which it appears.

- *Call Risk* – During periods of falling interest rates, an issuer of a callable bond held by the Fund may “call” or repay the security before its stated maturity, and the Fund may have to reinvest the proceeds at lower interest rates, resulting in a decline in the Fund’s income.
- *Convertible Debt Securities* – A convertible security is a form of hybrid security; that is, a security with both debt and equity characteristics. The value of a convertible security fluctuates in relation to changes in interest rates and the credit quality of the issuer and also fluctuates in relation to changes in the price of the underlying common stock. A convertible security may be subject to redemption at the option of the issuer at a price established in the convertible security’s governing instrument, which may be less than the current market price of the security. Convertible securities are subject to market risk, credit risk and interest rate risk as well as the same types of market and issuer-specific risks that apply to the underlying common stock.
- *Credit Risk* – The Fund is subject to the risk that the issuer or guarantor of a fixed income security becomes unable or unwilling, or is perceived as unable or unwilling, to make timely interest or principal payments or otherwise honor its obligations, which may cause the Fund’s holdings to lose value. A decline in the credit rating of an individual security held by the Fund may have an adverse impact on its price. The credit quality of a security can deteriorate suddenly and rapidly. Lower credit quality also may lead to greater volatility in the price of a security and may negatively affect a security’s liquidity. Credit risk is typically greater for securities with ratings that are downgraded below investment grade.
- *Cybersecurity Risk* – The Fund and its service providers, as well as the ability of shareholders to transact with the Fund, may be negatively impacted due to operational risks arising from, among other things, human or processing errors, systems and technology disruptions or failures, or cybersecurity incidents. Cybersecurity incidents may allow unauthorized parties to gain access to or misappropriate Fund assets, shareholder data, or confidential or proprietary information, or cause the Fund or its service providers to suffer data corruption or lose operational functionality. In addition, authorized persons could inadvertently release Fund shareholder data or confidential or proprietary information stored on the Fund’s systems. It is not possible for the Fund or its service providers to identify all of the operational risks that may affect the Fund or to develop processes and controls to completely eliminate or mitigate their occurrence or effects. Portfolio companies in which the Fund invests are also exposed to various risks related to cybersecurity incidents, and the value of the Fund’s investments in such portfolio companies could be adversely impacted in the event any such cybersecurity incidents occur.
- *Fixed Income Securities Risk* – The Fund invests in fixed income securities and is therefore subject to the risk that the prices of, and the income generated by, fixed income securities held by the Fund may decline significantly and/or rapidly in response to adverse issuer, geopolitical, regulatory, general economic and market conditions, or other developments, such as regional or global economic instability (including terrorism, pandemic and related geopolitical risks), interest rate fluctuations, and those events directly involving the issuers that may cause broad changes in market value, public perceptions concerning these developments, and adverse investor sentiment.
- *Foreign Securities Risk* – Non-U.S. investments carry potential risks not associated with domestic investments. Such risks include, but are not limited to: currency exchange rate fluctuations, political and financial instability, less liquidity and greater volatility of foreign investments, lack of uniform accounting, auditing and financing reporting standards, different government regulation and supervision of foreign banks, stock exchanges, brokers and listed companies, and delays in transaction settlement in some foreign markets. There may be very limited oversight of certain foreign banks or securities depositories that hold foreign securities and currency and the laws of certain countries may limit the ability to recover such assets if a foreign bank or depository or their agents goes bankrupt.
- *Government-Sponsored Enterprises Risk* – Securities held by the Fund that are issued by government-sponsored enterprises, such as the Federal Home Loan Bank, Federal National Mortgage Association, the Federal Home Loan Mortgage Corporation, Federal Farm Credit Banks, and the Tennessee Valley Authority are not guaranteed by the U.S. Treasury and are not backed by the full faith and credit of the U.S. Government. There is no assurance that the U.S. Government will provide financial support if these organizations do not have the funds to meet future payment obligations. They are also subject to market risk, credit risk and interest rate risk. In addition, mortgage pass-through securities issued by government-sponsored enterprises are subject to prepayment risk and extension risk, discussed below.
- *Inflation Risk* – Higher actual or anticipated inflation may have an adverse effect on corporate profits or consumer spending or the financial markets overall and result in lower values for securities held by the Fund.

- *Interest Rate Risk* – Changes in interest rates may affect the yield, liquidity and value of investments in income producing or debt securities. Market values of fixed income securities generally are inversely related to actual changes in interest rates – generally, when interest rates rise, the value of the Fund’s debt securities declines and when interest rates decline, the value of the Fund’s debt securities rises. As of the date of this prospectus, interest rates are historically low. In the future, interest rates may increase, significantly or rapidly, which could result in significant losses to the Fund. Typically, the longer the maturity or duration of a debt security, the greater the effect a change in interest rates could have on the security’s price. Generally, a bond with a longer maturity or duration will entail greater interest rate risk. Conversely, a bond with a shorter maturity or duration will generally entail less interest rate risk. A bond’s value may also be affected by changes in its credit rating or the issuer’s financial condition.
- *Investment Risk* – An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. When you sell your shares of the Fund, they could be worth less than what you paid for them. Therefore, you may lose money by investing in the Fund.
- *LIBOR Transition Risk* – The Fund may invest in securities or derivatives that use the London Interbank Offered Rate (“LIBOR” or “ICE LIBOR”) as a benchmark or reference rate for interest rate calculations. Plans are underway to phase out the use of LIBOR by the end of 2021. There remains uncertainty regarding the nature of any replacement rate and the impact of the transition from LIBOR on the Funds and the financial markets generally. The transition process, or the failure of an industry to transition, could lead to increased volatility and illiquidity in markets for instruments that currently rely on LIBOR to determine interest rates and a reduction in the values of some LIBOR-based investments, all of which would impact the Fund.
- *Liquidity Risk* – When there is little or no active trading market for specific types of securities, it can become more difficult for the Fund to sell securities at favorable times or prices. As a result, the Fund may have to lower the price on certain securities that it is trying to sell, sell other securities instead or forego an investment opportunity, any of which could have a negative effect on the Fund. Market developments may cause the Fund’s investments to become less liquid or illiquid and subject to erratic price movements. Certain investments that were liquid when purchased may become illiquid, sometimes abruptly, particularly in times of overall economic distress or adverse investor perception. A reduction in the ability or willingness of dealers and other institutional investors to make a market in certain securities may result in decreased liquidity in certain markets. Significant securities market disruptions related to outbreaks of COVID-19 have led to dislocation in the market for a variety of fixed income securities (including, but not limited to, commercial paper, corporate debt securities, certificates of deposit, asset-backed debt securities and municipal obligations), which has decreased liquidity and sharply reduced returns of certain fixed income securities.
- *Market Risk* – The Fund is subject to the risk that the securities markets will move down, sometimes rapidly and unpredictably, based on overall economic conditions and other factors, which may negatively affect the Fund’s performance. Factors that affect markets in general, including geopolitical, regulatory, market and economic developments and other developments that impact specific economic sectors, industries, companies and segments of the market, could adversely impact the Fund’s investments and lead to a decline in the value of your investment in the Fund. Geopolitical and other events, including war, terrorism, economic uncertainty, trade disputes, pandemics, public health crises and related events have led, and in the future may continue to lead, to instability in world economies and markets generally. Events that have led to recent market disruptions and turbulence include the pandemic spread of the novel coronavirus known as COVID-19, the duration and full effects of which are still uncertain. In addition, policy changes by the U.S. Government, the U.S. Federal Reserve and/or foreign governments and political events within the U.S. and abroad may cause increased volatility in financial markets, affect investor and consumer confidence and adversely impact the broader financial markets and economy, perhaps suddenly and to a significant degree. Market disruptions have caused, and may continue to cause, broad changes in market value, negative public perceptions concerning these developments, and adverse investor sentiment or publicity. Changes in value may be temporary or may last for extended periods.
- *Mortgage Pass-Through Securities* – Investments in mortgage pass-through securities, including pass-through securities issued by a U.S. Government sponsored enterprise, are subject to fixed income securities risks which include, but are not limited to, interest rate risk and credit risk. Mortgage pass-through securities are also subject to prepayment risk, which is the risk that borrowers will prepay their mortgages and cause a decline in the Fund’s income and share price, and extension risk. Extension risk is the risk that mortgage payments will decline during times of rising interest rates and extend the duration of these securities, making them more sensitive to interest rate changes.
- *Preferred Stocks Risk* – Preferred stocks are sensitive to movement in interest rates. Preferred stocks may be less liquid than common stocks and, unlike common stocks, participation in the growth of an issuer may be limited. Distributions on preferred stocks generally are payable at the discretion of an issuer and after required payments to bond holders.
- *Redemption Risk* – The Fund may experience periods of significant redemptions that could cause the Fund to sell assets at inopportune times or at a loss or depressed value. Redemption risk is heightened during periods of declining or illiquid markets. Significant redemptions could hurt the Fund’s performance. The sale of assets to meet redemption requests may

require the Fund to realize net capital gains, which could require the Fund to make substantial capital gains distributions to shareholders.

- *Sector Weighting Risk* – The Fund may focus its investments in particular sectors of the economy. To the extent the Fund emphasizes investments in particular sectors of the economy, the Fund will be subject to a greater degree of risks particular to those sectors. Market conditions, interest rates, and economic, regulatory, financial or geopolitical developments could significantly affect securities in particular sectors. Depending on the weightings of the Fund’s investment in particular sectors, the Fund may have increased exposure to price movements of securities in those sectors.
- *Security Selection Risk* – Securities selected by the Fund may not perform as anticipated due to a number of factors impacting the company that issued the securities or its particular industry or sector, such as poor operating or management performance, weak demand for the company’s products or services, the company’s failure to meet earnings or other operating performance expectations, financial leverage or credit deterioration, litigation or regulatory issues, or a decline in the value of the issuer’s business and assets.
- *U.S. Government Securities Risk* – A security backed by the U.S. Treasury or the full faith and credit of the United States is guaranteed only by the applicable entity as to the timely payment of interest and principal when held to maturity. Notwithstanding that a security may be backed by the full faith and credit of the U.S. Government, circumstances could arise that would prevent the payment of interest or principal. Any guarantee by the U.S. government or its agencies or instrumentalities of a security the Fund holds does not apply to the market value of the security or the shares of the Fund. Like all fixed income securities, U.S. Government fixed income securities are also subject to market risk, credit risk and interest rate risk.
- *Variable and Floating Rate Bond Risk* – The interest rates payable on variable and floating rate bonds are not fixed and may fluctuate based upon changes in market rates. A variable rate obligation has an interest rate which is adjusted at predesignated periods in response to changes in the market rate of interest on which the interest rate is based. The interest rate on a floating rate bond is a variable rate which is tied to another interest rate, such as a money-market index or Treasury bill rate. Variable and floating rate bonds are subject to market risk, interest rate risk and credit risk.

Performance: The bar chart and table that follow illustrate annual Fund returns for periods ended December 31. This information is intended to give you some indication of the risks of investing in the Fund by showing changes in the Fund’s performance from year to year and how the Fund’s average annual returns over time compare with an index that tracks the performance of fixed income securities and an index of funds with similar investment objectives. The Fund’s past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Updated performance information is available on the Fund’s website at www.lkcmfunds.com or by calling the Fund toll-free at 1-800-688-LKCM.

Calendar Year Returns as of 12/31

During the period shown on the bar chart, the Fund’s best and worst quarters are shown below:

Best and Worst Quarterly Returns

2.99%	3rd quarter, 2010
-1.41%	2nd quarter, 2013

Average Annual Total Returns for Periods Ended December 31, 2019

	<u>1 Year</u>	<u>5 Years</u>	<u>10 Years</u>
Return Before Taxes	6.70%	2.50%	2.97%
Return After Taxes on Distributions	5.72%	1.53%	1.88%
Return After Taxes on Distributions and Sale of Fund Shares	3.96%	1.49%	1.87%
<hr/>			
Bloomberg Barclays U.S. Intermediate Government/Credit Bond Index (reflects no deduction for fees, expenses or taxes)	6.80%	2.57%	3.05%
Lipper Short Intermediate Investment-Grade Debt Funds Index (reflects no deduction for taxes)	5.60%	2.29%	2.82%

After-tax returns are calculated using the historical highest individual federal marginal income tax rates, and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your tax situation and may differ from those shown. In certain cases, the figure representing “Return After Taxes on Distributions and Sale of Fund Shares” may be higher than the other return figures for the same period. A higher after-tax return results when a capital loss occurs upon redemption and provides an assumed tax deduction that benefits the investor. In addition, the after-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements such as 401(k) plans and individual retirement accounts.

Investment Adviser: Luther King Capital Management Corporation.

Portfolio Managers:

<u>Name</u>	<u>Title</u>	<u>Experience with the Fund</u>
Joan M. Maynard	Principal, Vice President and Portfolio Manager	Since Inception in 1997
Scot C. Hollmann, CFA, CIC	Principal, Vice President and Portfolio Manager	Since 2010
Mark L. Johnson, CFA, CIC	Principal, Vice President and Portfolio Manager	Since 2010

Purchase and Sale of Fund Shares: Investors may purchase, exchange or redeem Fund shares by mail (LKCM Funds, c/o U.S. Bank Global Fund Services, 615 East Michigan Street, 3rd Floor, Milwaukee, WI 53201-0701), or by telephone at 1-800-688-LKCM. Redemptions by telephone are only permitted upon previously receiving appropriate authorization. Transactions normally will only occur on days the New York Stock Exchange is scheduled to be open. Investors who wish to purchase or redeem Fund shares through a financial intermediary should contact the financial intermediary directly for information relative to the purchase or sale of Fund shares. The minimum initial amount of investment in the Fund and exchanges into the Fund from another fund in the LKCM Funds is \$2,000. Subsequent investments in the Fund for all types of accounts may be made with a minimum investment of \$1,000.

Tax Information: The Fund’s distributions are taxable to you and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account, in which case the withdrawal of your investment from the tax-deferred arrangement may be taxable.

Payments to Broker-Dealers and Other Financial Intermediaries: If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a financial adviser), the Fund and its related companies may pay the intermediary for the sale of Fund shares and/or other services. If made, these payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.

LKCM INTERNATIONAL EQUITY FUND

Investment Objective: The Fund seeks to maximize long-term capital appreciation.

Fees and Expenses of the Fund: The following table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. The Fund does not impose any sales charges in connection with purchases and sales of Fund shares. However, you may be required to pay a commission to your financial intermediary on purchases and sales of Fund shares, which are not reflected in the tables or example below.

Shareholder Fees

(fees paid directly from your investment)

Redemption Fee (as a percentage of the amount redeemed on shares held for less than 30 days)	1.00%
--	-------

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment)

Management Fees	0.90%
Distribution and Service (12b-1) Fees	0.00%
Other Expenses	3.19%
Acquired Fund Fees and Expenses ⁽¹⁾	0.02%
Total Annual Fund Operating Expenses	4.11%
Fee Waiver and/or Expense Reimbursement ⁽²⁾	-3.09%
Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement ⁽²⁾	1.02%

⁽¹⁾ Acquired Fund Fees and Expenses are indirect fees and expenses that funds incur from investing in the shares of other investment companies, including money market funds. The Total Annual Fund Operating Expenses and Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement for the Fund differ from the Ratio of Expenses to Average Net Assets before and after expense waiver and/or reimbursement found within the “Financial Highlights” section of the Prospectus because the audited information in the “Financial Highlights” reflects the operating expenses of the Fund and does not include indirect expenses such as Acquired Fund Fees and Expenses.

⁽²⁾ Luther King Capital Management Corporation (“Adviser”), the Fund’s investment adviser, has contractually agreed to waive all or a portion of its management fee and/or reimburse the Fund through May 1, 2021 in order to limit the Fund’s Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement to 1.00% per annum (excluding any interest, taxes, brokerage commissions, indirect fees and expenses related to investments in other investment companies, including money market funds (“Acquired Fund Fees and Expenses”), and extraordinary expenses). The fee waiver and expense reimbursement agreement may be terminated or changed only with the consent of the Board of Trustees.

Example

The following example is intended to help you compare the costs of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same (except that the example reflects the fee waiver/expense reimbursement arrangement through May 1, 2021). Although your actual costs may be higher or lower, based on these assumptions, whether or not you redeem your shares, your costs would be as follows:

<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
\$104	\$966	\$1,844	\$4,108

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the period from the Fund’s commencement of operations on May 1, 2019 through the fiscal year ended December 31, 2019, the portfolio turnover rate for the Fund was 2% of the average value of its portfolio.

Principal Investment Strategies: The Fund seeks to achieve its investment objective by investing primarily in equity securities of non-U.S. companies. The Fund invests under normal circumstances at least 80% of its net assets (plus any borrowings for investment purposes) in equity securities. These equity securities primarily consist of common stocks, preferred stocks, American Depositary Receipts (“ADRs”), and real estate investment trusts (“REITs”). In determining the origin of a company, the Fund primarily relies on the country where the company is incorporated, headquartered or has its principal place of business. The Fund may consider a company to be from a particular country even if it is not incorporated or headquartered in, or does not have its principal place of business in, that country if a majority of its assets are located in, or it derives a majority of its total revenues or profits from, goods or services produced or sales made in that country. The Fund generally invests in companies from developed markets, though it may invest to a lesser extent in companies from emerging markets. The Fund may focus its investments in companies located in or economically tied to particular countries or geographic regions. The Fund focuses its investments in issuers that are incorporated in, headquartered in, or have their principal place of business in, European countries, including the United Kingdom.

To a limited degree, the Fund may invest in companies based in the U.S. The Fund may also purchase or sell futures contracts and options on futures contracts for foreign or U.S. equity securities, indices or currencies, and may purchase foreign currency forward contracts, for hedging purposes. From time to time, in pursuing its investment strategies, the Fund may hold a significant percentage of its investments in specific sectors of the economy.

The Fund seeks to invest in the equity securities of high quality companies, as determined by the Adviser, that typically exhibit certain characteristics, including high profitability levels, strong balance sheet quality, competitive advantages, ability to generate excess cash flows, meaningful management ownership stakes, attractive reinvestment opportunities, strong market share positions, and/or attractive relative valuation. The Fund may invest in equity securities of small, mid and large capitalization companies, including dividend paying securities. The Fund may invest cash balances in other investment companies, including money market funds.

Principal Risks: The greatest risk of investing in the Fund is that you could lose money. There is no assurance that the Fund will achieve its investment objective. The principal risks of investing in the Fund listed below are presented in alphabetical order and not in order of importance or potential exposure. Among other matters, this presentation is intended to facilitate your ability to find particular risks and make comparisons with those of other funds. Each risk summarized below is considered a “principal risk” of investing in the Fund, regardless of the order in which it appears.

- *Currency Risk* – The Fund may have exposure to foreign currencies by making direct investments in securities denominated in non-U.S. currencies, purchasing or selling futures contracts and options on futures contracts for foreign or U.S. equity securities, indices or currencies, purchasing foreign currency forward contracts, and/or holding foreign currencies. Foreign currencies will fluctuate, and may decline, in value relative to the U.S. dollar and other currencies and thereby negatively affect the Fund’s holdings of foreign (non-U.S.) currencies or securities that trade in, and receive revenues in, or in derivatives that provide exposure to, foreign (non-U.S.) currencies.
- *Cybersecurity Risk* – The Fund and its service providers, as well as the ability of shareholders to transact with the Fund, may be negatively impacted due to operational risks arising from, among other things, human or processing errors, systems and technology disruptions or failures, or cybersecurity incidents. Cybersecurity incidents may allow unauthorized parties to gain access to or misappropriate Fund assets, shareholder data, or confidential or proprietary information, or cause the Fund or its service providers to suffer data corruption or lose operational functionality. In addition, authorized persons could inadvertently release Fund shareholder data or confidential or proprietary information stored on the Fund’s systems. It is not possible for the Fund or its service providers to identify all of the operational risks that may affect the Fund or to develop processes and controls to completely eliminate or mitigate their occurrence or effects. Portfolio companies in which the Fund invests are also exposed to various risks related to cybersecurity incidents, and the value of the Fund’s investments in such portfolio companies could be adversely impacted in the event any such cybersecurity incidents occur.
- *Derivatives Risk* – Derivatives are instruments, such as futures and foreign currency forward contracts, whose value is derived from that of other assets, rates, indices, or currencies. The use of derivatives may be considered to carry more risk than other types of investments and may expose the Fund to additional risks that it would not be subject to if it invested directly in the securities or other instruments underlying those derivatives. If the Fund uses derivatives, the Fund will be directly exposed to the risks of those derivatives. Derivative instruments are subject to a number of additional risks including counterparty, liquidity, interest rate, market, credit and management risks, and the risk of improper valuation. As a result, the Fund may obtain no recovery of its investment or may only obtain a limited recovery, and any recovery may be delayed. Not all derivative transactions require a counterparty to post collateral, which may expose the Fund to greater losses in the event that a counterparty is or becomes unwilling or unable to satisfy its obligation to make timely principal, interest or settlement payments or to otherwise honor its obligations to the Fund. The Fund’s use of derivatives also may create financial leverage, which may result in losses that exceed the amount originally invested and accelerate the rate of losses. Ongoing changes to regulation of the derivatives markets and potential changes in the regulation of funds using derivative instruments could limit the Fund’s ability to pursue its investment strategies. Changes in the value of a derivative may not correlate perfectly with the underlying instrument, and the Fund could lose more than the principal amount invested. In addition, the Fund’s investments in derivatives are subject to the following risks:

Foreign Currency Forward Contracts – Foreign currency forward contracts, including non-deliverable forwards, are derivative instruments pursuant to a contract with a counterparty to pay a fixed price for an agreed amount of a specific currency at a future date. The use of foreign currency forward contracts may expose the Fund to additional risks that it would not be subject to if it invested directly in the securities or currencies underlying the foreign currency forward contract.

Futures Contracts – Futures contracts are derivative instruments where the parties agree to a fixed price for an agreed amount of securities or other underlying assets at an agreed date or to buy or sell a specific currency at a future date at a price set at the time of the contract. Futures contracts may increase the volatility of the Fund and may involve a small investment of cash relative to the magnitude of the risk assumed. In addition: (i) there may not be a liquid secondary market for futures contracts, and the Fund may be unable to close a futures contract when desired; (ii) the Adviser may

not be able to predict correctly the direction of securities prices, currency exchange rates and other economic factors; and (iii) transaction costs associated with investments in futures contracts may be significant.

Options – For the purchase of a call option to be profitable to the purchaser, the market price of the underlying instrument must rise sufficiently above the call option exercise price to cover the premium and transaction costs, which will reduce any profit that might otherwise have been realized if the purchaser bought the underlying instrument instead of the call option. The Fund will receive a premium from writing call options, but it may not offset any losses sustained from exercised options if the underlying asset has increased in value when the call option is exercised. For the purchase of a put option to be profitable to the purchaser, the market price of the underlying security or instrument must decline sufficiently below the put option’s exercise price to cover the premium and transaction costs, which will reduce any profit the purchaser might have realized. The Fund will receive a premium from writing put options, but it may not offset any losses sustained from exercised options if the Fund is required to buy the underlying asset at a disadvantageous price. Options on futures contracts may be subject to additional risks, including risks associated with the underlying futures contract.

- *Dividend Paying Securities Risk* – Securities that pay higher dividends as a group can fall out of favor with the market, causing these companies to underperform companies that do not pay high or any dividends. Also, changes in the dividend policies of companies owned by the Fund and the capital resources available for these companies’ dividend payments may reduce the level of dividend payments and adversely affect the Fund.
- *Emerging Markets Risk* – When investing in emerging markets, the risks of investing in foreign securities discussed below are heightened. Stock markets in many emerging market countries are relatively small, less developed, less liquid, more volatile, more expensive to trade in, and generally have higher risks than those in developed markets. Securities in emerging markets also may be less liquid than those in developed markets and foreigners are often limited in their ability to invest in, and withdraw assets from, these markets. Additional restrictions may be imposed under other conditions. Numerous emerging market countries have a history of, and continue to experience serious, and potentially continuing, economic and political challenges. There are also risks of: greater political uncertainties; an economy’s dependence on revenues from particular commodities or on international aid or development assistance; currency transfer restrictions; a limited number of potential buyers for such securities resulting in increased volatility and limited liquidity for emerging market securities; trading suspensions; and delays and disruptions in securities settlement procedures.
- *Equity Securities Risk* – The Fund invests in equity securities and therefore is subject to market risks and significant fluctuations in value. Equity securities are generally subordinate to an issuer’s debt in the event of liquidation or bankruptcy. The Fund’s investments in equity securities primarily consist of ADRs, common stocks, preferred stock and REITs.

ADRs – Investments in ADRs are subject to certain of the risks associated with investing directly in foreign securities, such as currency fluctuations, political and economic instability, capital restrictions, less government regulation, less publicly available information, less liquidity, increased price volatility, and differences in financial reporting standards. ADRs may not accurately track the prices of the underlying foreign securities and their value may change materially at times when the U.S. markets are not open for trading. Investing in such securities may expose the Fund to additional risk.

Common Stock – The value of an issuing company’s common stock may rise or fall as a result of factors affecting the issuing company, other companies in the same industry or sector, or the financial markets overall. Common stock generally is subordinate to preferred stock upon the liquidation or bankruptcy of the issuing company.

Preferred Stock – Preferred stocks are sensitive to movement in interest rates. Preferred stocks may be less liquid than common stocks and, unlike common stocks, participation in the growth of an issuer may be limited. Distributions on preferred stocks generally are payable at the discretion of an issuer and after required payments to bond holders.

REITs – Investments in REITs are subject to the risks associated with the real estate industry, adverse governmental actions, declines in property and real estate values, risks related to general and local economic conditions, increases in property taxes and operating expenses, overbuilding, changes in interest rates, liabilities resulting from environmental problems, and the potential failure of a REIT to qualify for federal income-tax-free “pass-through” of net income and net realized gains that are distributed to shareholders and exemption from registration as an investment company. REITs are dependent upon specialized management skills and may invest in relatively few properties, a small geographic area or a small number of property types. As a result, investments in REITs may be volatile. REITs are pooled investment vehicles with their own fees and expenses and the Fund will indirectly bear a proportionate share of those fees and expenses when investing in REITs.

- *Foreign Securities Risk* – Non-U.S. investments carry potential risks not associated with domestic investments. Such risks include, but are not limited to: currency exchange rate fluctuations, political and financial instability, less liquidity and greater volatility of foreign investments, lack of uniform accounting, auditing and financing reporting standards, different government regulation and supervision of foreign banks, stock exchanges, brokers and listed companies, and delays in transaction settlement in some foreign markets. There may be very limited oversight of certain foreign banks or securities depositories that

hold foreign securities and currency and the laws of certain countries may limit the ability to recover such assets if a foreign bank or depositary or their agents goes bankrupt. To the extent the Fund invests a significant portion of its assets in securities of a single country or geographic region at any one time, it is more likely to be affected by events or conditions in that country or region. As a result, it may be more volatile than a more geographically diversified fund.

- *Geographic Concentration Risk* – The Fund may focus its investments in companies located in or economically tied to particular countries or geographic regions. This could increase the risk that economic, political, business, regulatory, diplomatic, social and environmental conditions in that particular country or geographic region may have a significant impact on the Fund’s performance. Investing in such a manner could cause the Fund’s performance to be more volatile than the performance of more geographically diverse funds. In addition, the risks associated with investing in a narrowly defined geographic area are generally more pronounced with respect to investments in emerging market countries.

European Securities Risk – To the extent the Fund invests significantly in the securities of European companies, the Fund’s performance may be influenced by social, political and economic conditions in Europe. The economies of European Union (“EU”) member countries and their trading partners, as well as the broader global economy, may be adversely affected by changes in the euro’s exchange rate, changes in EU or governmental regulations on trade, and the threat of default or an actual default by an EU member country on its sovereign debt, which could negatively impact the Fund’s investments and cause it to lose money. Responses to financial problems in European governments may not work, may result in social unrest and may limit future growth and economic recovery or have other unintended consequences.

United Kingdom Securities Risk – The Fund’s exposure to issuers located in, or with economic ties to, the United Kingdom, could expose the Fund to regulatory, political, currency and economic risks associated with investments in the United Kingdom. On January 31, 2020, the United Kingdom left the EU and entered into a transition period that is scheduled to end on December 31, 2020. Brexit has introduced, and may continue to introduce, significant uncertainties and instability in the financial markets. Negotiations to settle what form Brexit will take are due to be finalized during the transition period and, therefore, at present the political and economic consequences of Brexit are uncertain, including the effect of Brexit on the United Kingdom’s economy or the broader global economy or the value of the British pound. There is significant market uncertainty regarding Brexit’s ramifications, and the range and potential implications of possible political, regulatory, economic and market outcomes cannot be fully known. The depreciation of the British pound sterling and/or the Euro in relation to the US dollar as a result of Brexit would adversely affect the Fund’s investments denominated in British pound sterling or Euros that are not fully hedged regardless of the performance of the underlying issuer. Any further withdrawals from the EU could cause additional market disruption globally.

- *Hedging Risk* – If the Fund uses a hedging instrument at the wrong time or judges the market conditions incorrectly, or the hedged instrument does not correlate to the risk sought to be hedged, the hedge might be unsuccessful, reduce the Fund’s return, or create a loss. In addition, hedges, even when successful in mitigating risk, may not prevent the Fund from experiencing losses on its investments, and therefore the use of hedging strategies may reduce the Fund’s return, or create a loss.
- *Inflation Risk* – Higher actual or anticipated inflation may have an adverse effect on corporate profits or consumer spending or the financial markets overall and result in lower values for securities held by the Fund.
- *Investment Risk* – An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. When you sell your shares of the Fund, they could be worth less than what you paid for them. Therefore, you may lose money by investing in the Fund.
- *Large Cap Companies Risk* – The securities of large market capitalization companies may underperform other segments of the market because such companies may be less responsive to competitive challenges and opportunities and may be unable to attain or maintain high growth rates during periods of economic expansion.
- *Liquidity Risk* – When there is little or no active trading market for specific types of securities, it can become more difficult for the Fund to sell securities at favorable times or prices. As a result, the Fund may have to lower the price on certain securities that it is trying to sell, sell other securities instead or forego an investment opportunity, any of which could have a negative effect on the Fund. Market developments may cause the Fund’s investments to become less liquid or illiquid and subject to erratic price movements. Liquidity risk is particularly acute in the case of foreign investments that are traded in smaller, less-developed or emerging markets and securities issued by issuers with smaller market capitalizations. Certain investments that were liquid when purchased may become illiquid, sometimes abruptly, particularly in times of overall economic distress or adverse investor perception.
- *Market Risk* – The Fund is subject to the risk that the securities markets will move down, sometimes rapidly and unpredictably, based on overall economic conditions and other factors, which may negatively affect the Fund’s performance. Factors that affect markets in general, including geopolitical, regulatory, market and economic developments and other developments that impact specific economic sectors, industries, companies and segments of the market, could adversely impact the Fund’s investments and lead to a decline in the value of your investment in the Fund. Geopolitical and other events, including war, terrorism, economic uncertainty, trade disputes, pandemics, public health crises and related events have led, and

in the future may continue to lead, to instability in world economies and markets generally. Events that have led to recent market disruptions and turbulence include the pandemic spread of the novel coronavirus known as COVID-19, the duration and full effects of which are still uncertain. In addition, policy changes by the U.S. Government, the U.S. Federal Reserve and/or foreign governments and political events within the U.S. and abroad may cause increased volatility in financial markets, affect investor and consumer confidence and adversely impact the broader financial markets and economy, perhaps suddenly and to a significant degree. Market disruptions have caused, and may continue to cause, broad changes in market value, negative public perceptions concerning these developments, and adverse investor sentiment or publicity. Changes in value may be temporary or may last for extended periods.

- *Other Investment Companies Risk* – A Fund that invests in shares of other registered investment companies, including money market funds, will indirectly bear the fees and expenses charged by those investment companies in addition to the Fund’s direct fees and expenses. Investment in money market funds are subject to interest rate risk, credit risk, and market risk.
- *Redemption Risk* – The Fund may experience periods of significant redemptions that could cause the Fund to sell assets at inopportune times or at a loss or depressed value. Redemption risk is heightened during periods of declining or illiquid markets. Significant redemptions could hurt the Fund’s performance. The sale of assets to meet redemption requests may require the Fund to realize net capital gains, which could require the Fund to make substantial capital gains distributions to shareholders.
- *Sector Weighting Risk* – The Fund may focus its investments in particular sectors of the economy. To the extent the Fund emphasizes investments in particular sectors of the economy, the Fund will be subject to a greater degree of risks particular to those sectors. Market conditions, interest rates, and economic, regulatory, financial or geopolitical developments could significantly affect securities in particular sectors. Depending on the weightings of the Fund’s investment in particular sectors, the Fund may have increased exposure to price movements of securities in those sectors.
- *Security Selection Risk* – Securities selected by the Fund may not perform as anticipated due to a number of factors impacting the company that issued the securities or its particular industry or sector, such as poor operating or management performance, weak demand for the company’s products or services, the company’s failure to meet earnings or other operating performance expectations, financial leverage or credit deterioration, litigation or regulatory issues, or a decline in the value of the issuer’s business and assets.
- *Small and Mid Cap Companies Risk* – The Fund invests in small and mid capitalization companies that may not have the size, resources and other assets of large capitalization companies. Small and mid capitalization companies may also have narrower commercial markets and more limited operating histories, product lines, and managerial and financial resources than larger, more established companies. Small and mid capitalization companies may be more sensitive to changes in interest rates, borrowing costs and earnings. As a result, the securities of small and mid capitalization companies held by the Fund may be less liquid and subject to greater market risks and fluctuations in value than large capitalization companies or may not correspond to changes in the stock market in general. In general, these risks are greater for small capitalization companies than for mid capitalization companies.
- *Valuation Risk* – The Fund may value certain securities at a price different from the price at which they can be sold. This risk may be especially pronounced for investments, such as certain derivatives and foreign investments, which may be illiquid or which may become illiquid.

Performance: Performance information for the Fund is not included because the Fund has not had one full calendar year of performance. Performance information will be available once the Fund has had at least one full calendar year of performance. Updated performance information is available on the Fund’s website at www.lkcmfunds.com or by calling the Fund toll-free at 1-800-688-LKCM.

Investment Adviser: Luther King Capital Management Corporation.

Portfolio Managers:

<u>Name</u>	<u>Title</u>	<u>Experience with the Fund</u>
Mason D. King, CFA	Principal, Vice President, Portfolio Manager and Analyst	Since Inception in 2019
J. Luther King, Jr., CFA, CIC	Principal, President and Portfolio Manager	Since Inception in 2019

Purchase and Sale of Fund Shares: Investors may purchase, exchange or redeem Fund shares by mail (LKCM Funds, c/o U.S. Bank Global Fund Services, 615 East Michigan Street, 3rd Floor, Milwaukee, WI 53201-0701), or by telephone at 1-800-688-LKCM. Redemptions by telephone are only permitted upon previously receiving appropriate authorization. Transactions normally will only occur on days the New York Stock Exchange is scheduled to be open. Investors who wish to purchase or redeem Fund shares through a financial intermediary should contact the financial intermediary directly for information relative to the purchase or sale of Fund shares. The minimum initial amount of investment in the Fund and exchanges into the Fund from another fund in the LKCM Funds is \$2,000. Subsequent investments in the Fund for all types of accounts may be made with a minimum investment of \$1,000.

Tax Information: The Fund's distributions are taxable to you and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account, in which case the withdrawal of your investment from the tax-deferred arrangement may be taxable.

Payments to Broker-Dealers and Other Financial Intermediaries: If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a financial adviser), the Fund and its related companies may pay the intermediary for the sale of Fund shares and/or other services. If made, these payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

**ADDITIONAL INFORMATION REGARDING THE INVESTMENT OBJECTIVES
AND PRINCIPAL INVESTMENT STRATEGIES OF THE FUNDS**

Small Cap Equity Fund The Fund seeks to maximize long-term capital appreciation.

The Fund seeks to achieve its investment objective by primarily choosing investments that Luther King Capital Management Corporation (“Adviser”) believes are likely to have above-average growth in revenue and/or earnings and potential for above-average capital appreciation. The Fund invests under normal circumstances at least 80% of its net assets (plus any borrowings for investment purposes) in equity securities of smaller companies. Smaller companies are those with market capitalizations at the time of investment between \$600 million and \$5 billion. The Fund is not required to sell equity securities whose market values appreciate or depreciate outside this market capitalization range. The equity securities in which the Fund invests primarily consist of common stocks, American Depositary Receipts (“ADRs”), and real estate investment trusts (“REITs”). From time to time, in pursuing its investment strategies, the Fund may hold a significant percentage of its investments in specific sectors of the economy.

The Adviser’s primary strategy in managing the Fund is to identify high quality companies, as determined by the Adviser, that typically exhibit certain characteristics, including high profitability levels, strong balance sheet quality, competitive advantages, ability to generate excess cash flows, meaningful management ownership stakes, attractive reinvestment opportunities, strong market share positions, and/or attractive relative valuation.

**Small-Mid Cap
Equity Fund**

The Fund seeks to maximize long-term capital appreciation.

The Fund seeks to achieve its investment objective by primarily choosing investments that the Adviser believes are likely to have above-average growth in revenue and/or earnings and potential for above-average capital appreciation. The Fund invests under normal circumstances at least 80% of its net assets (plus any borrowings for investment purposes) in equity securities of small-mid capitalization companies. Small-mid capitalization companies are those with market capitalizations at the time of investment between \$1.25 billion and \$12 billion. The Fund is not required to sell equity securities whose market values appreciate or depreciate outside this market capitalization range. The equity securities in which the Fund invests primarily consist of common stocks, ADRs, and REITs. From time to time, in pursuing its investment strategies, the Fund may hold a significant percentage of its investments in specific sectors of the economy.

The Adviser’s primary strategy in managing the Fund is to identify high quality companies, as determined by the Adviser, that typically exhibit certain characteristics, including high profitability levels, strong balance sheet quality, competitive advantages, ability to generate excess cash flows, meaningful management ownership stakes, attractive reinvestment opportunities, strong market share positions, and/or attractive relative valuation.

Equity Fund

The Fund seeks to maximize long-term capital appreciation.

The Fund seeks to achieve its investment objective by primarily choosing investments that the Adviser believes are likely to have above-average growth in revenue and/or earnings, above-average returns on shareholders’ equity, potential for above-average capital appreciation, and/or companies that the Adviser believes have attractive relative valuations. The Fund invests under normal circumstances at least 80% of its net assets (plus any borrowings for investment purposes) in equity securities. The equity securities in which the Fund invests primarily consist of common stocks, ADRs, and REITs. The Fund may invest in equity securities of small, mid and large capitalization companies, including dividend paying securities. From time to time, in pursuing its investment strategies, the Fund may hold a significant percentage of its investments in specific sectors of the economy.

The Adviser’s primary strategy in managing the Fund is to identify high quality companies, as determined by the Adviser, that typically exhibit certain characteristics, including high profitability levels, strong balance sheet quality, competitive advantages, ability to generate excess cash flows, meaningful management ownership stakes, attractive reinvestment opportunities and/or strong market share positions.

Balanced Fund

The Fund seeks current income and long-term capital appreciation.

The Fund seeks to achieve its investment objective by investing primarily in a portfolio of equity and fixed income securities. The Fund’s investments in equity securities primarily consist of common stocks, ADRs, and REITs. Under normal circumstances, 25% or more of the Fund’s total assets will consist of fixed income securities. The Fund’s investments in fixed income securities will consist primarily of

investment grade corporate fixed income securities and fixed income securities issued or guaranteed by the U.S. Government, its agencies or instrumentalities. The Fund typically invests in fixed income securities with short- to intermediate-term maturities from one to ten years. Investment grade securities are considered to be those rated within the four highest rating categories by a nationally recognized statistical ratings organization, such as Moody's Investors Service, Inc., Fitch Ratings, Inc. or S&P Global Ratings, or of equivalent quality as determined by the Adviser. The Fund does not presently intend to invest more than 20% of its total assets in equity securities that do not pay dividends. From time to time, in pursuing its investment strategies, the Fund may hold a significant percentage of its investments in specific sectors of the economy.

The Adviser's primary strategy in managing the Fund's equity investments is to identify high quality companies, as determined by the Adviser, that typically exhibit certain characteristics, including high profitability levels, strong balance sheet quality, competitive advantages, ability to generate excess cash flows, meaningful management ownership stakes, attractive reinvestment opportunities, strong market share positions, and/or attractive relative valuation. The Fund may invest in securities of small, mid and large capitalization companies, including dividend paying securities.

The Adviser's primary strategy in managing the Fund's fixed income investments is to select debt securities based on factors such as price coupon, yield to maturity, the credit quality of the issuer, the issuer's cash flow and related coverage ratios, the property, if any, securing the obligation and the terms of the security, including subordination, default, sinking fund and early redemption provisions. If securities held by the Fund are downgraded below investment grade, the Adviser will consider whether or not to continue to hold such securities.

Fixed Income Fund

The Fund seeks current income.

The Fund invests under normal circumstances at least 80% of its net assets (plus any borrowings for investment purposes) in a portfolio of investment grade corporate and U.S. Government fixed income securities. The Fund's investments in fixed income securities consist primarily of investment grade corporate fixed income securities and fixed income securities issued or guaranteed by the U.S. Government, its agencies or instrumentalities. The Fund typically invests in fixed income securities with short- to intermediate-term maturities from one to ten years. Investment grade securities are considered to be those rated within the four highest rating categories by a nationally recognized statistical ratings organization, such as Moody's Investors Service, Inc., Fitch Ratings, Inc. or S&P Global Ratings, or of equivalent quality as determined by the Adviser. The Fund may invest in all types of domestic or U.S. dollar-denominated foreign fixed income securities in any proportion, including bonds, notes, convertible bonds, mortgage pass-through securities, government and government agency securities, variable and floating rate bonds, preferred stock and short-term obligations such as commercial paper and notes, bank deposits and other financial obligations.

The Fund seeks to maintain an average effective maturity of its portfolio between three and ten years under normal market and economic conditions. The effective maturity of securities with sinking fund or other early redemption features will be estimated by the Adviser, based upon prevailing interest rate trends and the issuer's financial position. The average effective maturity of the Fund's portfolio may be less than three years if the Adviser believes a defensive posture is appropriate. From time to time, in pursuing its investment strategies, the Fund may hold a significant percentage of its investments in specific sectors of the economy.

The Adviser's primary strategy in managing the Fund is to select debt securities based on factors such as price coupon, yield to maturity, the credit quality of the issuer, the issuer's cash flow and related coverage ratios, the property, if any, securing the obligation and the terms of the security, including subordination, default, sinking fund and early redemption provisions. If securities held by the Fund are downgraded below investment grade, the Adviser will consider whether or not to continue to hold such securities.

International Equity Fund

The Fund seeks to maximize long-term capital appreciation.

The Fund seeks to achieve its investment objective by investing primarily in equity securities of non-U.S. companies. The Fund invests under normal circumstances at least 80% of its net assets (plus any borrowings for investment purposes) in equity securities. These equity securities primarily consist of common stocks, preferred stocks, ADRs, and REITs. In determining the origin of a company, the Fund primarily relies on the country where the issuer is incorporated, headquartered or has its principal place of business. The Fund may consider a company to be from a particular country even if it is not incorporated or headquartered in, or does not have its principal place of business in, that country if a majority of its

assets are located in, or it derives a majority of its total revenue or profits from, goods or services produced or sales made in that country. The Fund generally invests in companies from developed markets, though it may invest to a lesser extent in companies from emerging markets. The Fund may focus its investments in companies located in or economically tied to particular countries or geographic regions. The Fund initially intends to focus its investments in issuers that are incorporated in, headquartered in, or have their principal place of business in, European countries. To a limited degree, the Fund may also invest in companies based in the U.S. The Fund may also purchase or sell futures contracts and options on futures contracts for foreign or U.S. equity securities, indices or currencies, and may purchase foreign currency forward contracts, for hedging purposes. From time to time, in pursuing its investment strategies, the Fund may hold a significant percentage of its investments in specific sectors of the economy.

The Adviser's primary strategy in managing the Fund is to identify high quality companies, as determined by the Adviser, that typically exhibit certain characteristics, including high profitability levels, strong balance sheet quality, competitive advantages, ability to generate excess cash flows, meaningful management ownership stakes, attractive reinvestment opportunities, strong market share positions, and/or attractive relative valuation. The Fund may invest in equity securities of small, mid and large capitalization companies, including dividend paying securities.

Each Fund (except for the Balanced Fund, which does not have an 80% investment policy) has adopted a non-fundamental policy to notify its shareholders at least 60 days before it changes its 80% investment policy described above. Each Fund's investment objective is non-fundamental, which means that it may be changed by action of the Board of Trustees of the Trust without shareholder approval.

DISCUSSION OF INVESTMENT APPROACH

Small Cap Equity, Small-Mid Cap Equity, Equity, Balanced (Equity Portfolio) and International Equity Funds

The Adviser follows an equity investment approach grounded in the fundamental analysis of individual companies. The Adviser seeks to identify high quality companies, as determined by the Adviser, based on various quantitative and qualitative financial and fundamental criteria. Companies meeting these criteria will typically exhibit a number of the following characteristics:

- High profitability levels;
- Strong balance sheet quality;
- Competitive advantages;
- Strong market share positions;
- Attractive reinvestment opportunities;
- Ability to generate excess cash flow after capital expenditures;
- Management with a meaningful ownership stake in the company; and/or
- Attractive relative valuation.

Balanced (Fixed Income Portfolio) and Fixed Income Funds

The Adviser's fixed income investment approach concentrates primarily on investment grade corporate fixed income securities and fixed income securities issued or guaranteed by the U.S. Government, its agencies or instrumentalities with short- to intermediate-term maturities from one to ten years. The Adviser's security selection process is heavily credit-driven and focuses on the issuer's earnings and cash flow trends, its competitive positioning, and the dynamics of its industry. The Adviser's fixed income philosophy typically combines noncallable bonds for their offensive characteristics with callable bonds for their defensive characteristics in an attempt to enhance returns while controlling the level of risk.

The Adviser's fixed income approach also seeks to identify securities with a combination of attractive coupons and various early redemption features. These defensive issues can offer higher levels of current income with relatively limited price volatility due to the possibility that they will be retired by the issuer much sooner than the final maturity. Callable bonds are typically used as alternatives to traditional short-term noncallable securities. Maturity decisions are primarily a function of the Adviser's macroeconomic analysis and are typically implemented utilizing short to intermediate maturity, noncallable securities. Finally, the credit analysis performed by the Adviser on individual companies, as well as industries, is enhanced by the Adviser's experience in the equity markets and the quantitative and qualitative financial and fundamental criteria incorporated into the Adviser's equity investment approach. The analytical effort typically concentrates on market leading, profitable, well-financed debt issuers.

To respond to adverse market, economic, political or other conditions, each Fund may adopt a temporary defensive position, during which the Fund may invest in cash, time deposits, commercial paper, certificates of deposits, short term corporate and government obligations, repurchase agreements and bankers' acceptances. To the extent that a Fund engages in a temporary,

defensive strategy, the Fund may not achieve its investment objective. A defensive position, taken at the wrong time, such as when the markets unexpectedly rise rather than decline, may have an adverse impact on a Fund's performance.

ADDITIONAL INFORMATION REGARDING THE PRINCIPAL RISKS OF INVESTING IN THE FUNDS

An investment in any of the Funds entails risks. You should be aware that you may lose money by investing in the Funds, and the Funds' performance could trail that of other investment alternatives. There is no assurance that a Fund will meet its investment objectives. The table below provides additional principal risks of investing in the Funds. Following the table, each risk is explained. The principal risks of investing in each Fund listed below are presented in alphabetical order and not in order of importance or potential exposure. Among other matters, this presentation is intended to facilitate your ability to find particular risks and make comparisons with those of other funds. Each risk summarized below is considered a "principal risk" of investing in a Fund, regardless of the order in which it appears.

Call Risk: During periods of falling interest rates, an issuer of a callable bond held by a Fund may "call" or repay the security before its stated maturity. A Fund would then lose any price appreciation above the bond's call price, and would be forced to reinvest the unanticipated proceeds at lower interest rates, resulting in a decline in the Fund's income.

Convertible Debt Securities: A convertible security is a form of hybrid security; that is, a security with both debt and equity characteristics. The value of a convertible security fluctuates in relation to changes in interest rates and the credit quality of the issuer and also fluctuates in relation to changes in the price of the underlying common stock. A convertible security tends to perform more like common stock when the underlying common stock price is high relative to the conversion price of the convertible security and more like a fixed income security when the underlying common stock price is low relative to the conversion price of the convertible security. A convertible security may be subject to redemption at the option of the issuer at a price established in the convertible security's governing instrument, which may be less than the current market price of the security. Convertible securities are subject to market risk, credit risk and interest rate risk as well as the same types of market and issuer-specific risks that apply to the underlying common

stock. Convertible securities are normally “junior” securities, which means an issuer usually must pay interest on its non-convertible debt securities before it can make payments on its convertible securities. If an issuer stops making interest or principal payments, these securities may become worthless and a Fund could lose its entire investment in such securities. In the event of a liquidation of the issuing company, holders of convertible securities may be paid before the company’s common stock holders but after holders of any senior debt obligations of the company.

Credit Risk:

A Fund is subject to the risk that the issuer or guarantor of a fixed income security becomes unable or unwilling, or is perceived (whether by market participants, ratings agencies, pricing services or otherwise) as unable or unwilling, to make timely interest or principal payments or otherwise honor its obligations, which may cause the Fund’s holdings to lose value. The extent of this risk varies based on the terms of the particular security and the financial condition of the issuer. A security’s degree of credit risk is often reflected in its credit rating, with higher ratings corresponding to lower perceived credit risk. A downgrade in an issuer’s credit rating or other adverse news about an issuer can reduce the market value of that issuer’s securities. The credit quality of a security can deteriorate suddenly and rapidly. Lower credit quality also may lead to greater volatility in the price of a security and may negatively affect a security’s liquidity. In addition, credit ratings agencies may fail to make timely changes to credit ratings in response to subsequent events and a credit rating may fail to reflect changes in an issuer’s financial condition. Credit ratings reflect a rating agency’s opinion regarding a security’s quality but are not a guarantee of quality and do not protect against a decline in a security’s value. Credit risk is typically greater for securities with ratings that are downgraded below investment grade.

Currency Risk:

A Fund may have exposure to foreign currencies by making direct investments in securities denominated in non-U.S. currencies, purchasing or selling futures contracts and options on futures contracts for foreign or U.S. equity securities, indices or currencies, purchasing foreign currency forward contracts, and/or holding foreign currencies. Foreign currencies may decline in value relative to the U.S. dollar, or, in the case of hedging positions, the U.S. dollar may decline in value relative to the currency being hedged, and thereby negatively affect a Fund’s holdings of foreign (non-U.S.) currencies or securities that trade in, and receive revenues in, or in derivatives that provide exposure to, foreign (non-U.S.) currencies. Currency exchange rates may fluctuate significantly over short periods of time for a number of reasons, including changes in interest rates, intervention (or the failure to intervene) by U.S. or foreign governments, central banks or supranational entities such as the International Monetary Fund, or by the imposition of currency controls or other political developments in the U.S. or abroad. As a result, a Fund’s investments in foreign currency denominated securities may reduce the returns of such Fund. Currency futures, forwards or options may not always work as intended, and in specific cases a Fund may be more negatively impacted than if it had not used such instrument(s). There may not always be suitable hedging instruments available. Even where suitable hedging instruments are available, a Fund may not hedge its currency risks.

Cybersecurity Risk:

A Fund and its service providers, as well as the ability of shareholders to transact with a Fund, may be negatively impacted due to operational risks arising from, among other things, human or processing errors, systems and technology disruptions or failures, or cybersecurity incidents. Cybersecurity incidents may allow unauthorized parties to gain access to or misappropriate a Fund’s assets, shareholder data, or confidential or proprietary information, or cause a Fund or its service providers to suffer data corruption or lose operational functionality. In addition, authorized persons could inadvertently release Fund shareholder data or confidential or proprietary information stored on the Fund’s systems. It is not possible for a Fund or its service providers to identify all of the operational risks that may affect a Fund or to develop processes and controls to completely eliminate or mitigate their occurrence or effects. Portfolio companies in which a Fund invests are also exposed to various risks related to cybersecurity incidents, and the value of a Fund’s investments in such portfolio companies could be adversely impacted in the event any such cybersecurity incidents occur. A Fund may incur substantial costs to prevent or address cybersecurity incidents in the future.

Derivatives Risk:

Derivatives are instruments, such as futures and foreign currency forward contracts, whose value is derived from that of other assets, rates, indices, or currencies. A Fund may use derivatives to hedge against fluctuations in currency exchange rates, to manage certain investment risks or as a substitute for the purchase or sale of the underlying currencies or securities. A Fund may also hold derivative instruments to obtain economic exposure to an issuer without directly holding its securities.

The use of derivatives may be considered to carry more risk than other types of investments and may expose a Fund to additional risks that it would not be subject to if it invested directly in the securities or other instruments underlying those derivatives. If a Fund uses derivatives, such Fund will be directly exposed to the risks of those derivatives. Derivatives can be highly complex and their use within an

investment strategy can require specialized skills. There can be no assurance that any strategy used will succeed. In addition, leverage embedded in a derivative instrument can expose a Fund to greater risk and increase its costs. Gains or losses in the value of a derivative instrument may be magnified and be much greater than the original amount invested (generally the initial margin deposit). Some derivatives have the potential for unlimited loss, regardless of the size of a Fund's initial investment, for example, where a Fund may be called upon to deliver a security it does not own. Derivatives may be illiquid and may be more volatile than other types of investments. A Fund may not be able to close out or sell a derivative position at a particular time or at an anticipated price. A Fund may buy or sell derivatives not traded on an exchange or contract market and which may be subject to heightened liquidity and valuation risk. Derivative instruments are subject to a number of other risks including counterparty, interest rate, market, credit and management risks. As a result, a Fund may obtain no recovery of its investment or may only obtain a limited recovery, and any recovery may be delayed. Not all derivative transactions require a counterparty to post collateral, which may expose a Fund to greater losses in the event that a counterparty is or becomes unwilling or unable to satisfy its obligation to make timely principal, interest or settlement payments or to otherwise honor its obligations to such Fund. Certain derivatives, including futures and written options, require a Fund to post margin to secure its future obligation, and if such Fund has insufficient cash, it may have to sell investments from its portfolio to meet daily variation margin requirements at a time when it may be disadvantageous to do so. Because the markets for certain derivative instruments (including markets located in foreign countries) are relatively new and still developing, suitable derivatives transactions may not be available in all circumstances for risk management or other purposes, and there can be no assurance that a Fund will use derivatives to reduce exposure to other risks when that might have been beneficial. Changes in the value of a derivative may not correlate perfectly with the underlying asset, rate, index or currency. A Fund's use of derivatives also may create financial leverage, which may result in losses that exceed the amount originally invested and accelerate the rate of losses.

Ongoing changes to regulation of the derivatives markets and potential changes in the regulation of funds using derivative instruments could limit a Fund's ability to pursue its investment strategies. The extent and impact of the regulation is not yet fully known and may not be for some time. New regulation may make derivatives more costly, may limit their availability, may disrupt markets, or may otherwise adversely affect their value or performance. In addition to other changes, these rules provide for central clearing of derivatives that in the past were traded exclusively over-the-counter and may increase costs and margin requirements, but are expected to reduce certain counterparty risks.

Upon the expiration of a particular contract, the Adviser may wish to retain a Fund's position in the derivative instrument by entering into a similar contract, but may be unable to do so if the counterparty to the original contract is unwilling to enter into the new contract and no other suitable counterparty can be found. A Fund's ability to use derivatives may also be limited by certain regulatory and tax considerations. For example, the Commodity Futures Trading Commission ("CFTC") and the designated contract markets have established position limits for futures and option contracts that may restrict the ability of a Fund, or the Adviser entering trades on such Fund's behalf, to make certain trading decisions.

Certain of the other risks to which a Fund might be exposed due to its use of derivatives include the following:

- **Foreign Currency Forward Contracts.** Foreign currency forward contracts, including non-deliverable forwards ("NDFs"), are derivative instruments pursuant to a contract with a counterparty to pay a fixed price for an agreed amount of securities or other underlying assets at an agreed date or to buy or sell a specific currency at a future date at a price set at the time of the contract. The use of foreign currency forward contracts may expose a Fund to additional risks that it would not be subject to if it invested directly in the securities or currencies underlying the foreign currency forward contract. Foreign currency forward transactions include risks associated with fluctuations in foreign currency. There are no limitations on daily price movements of forward contracts. There may at times be an imperfect correlation between the price of a forward contract and the underlying security, index or currency which will increase the volatility of a Fund. Not all forward contracts, including NDFs, require a counterparty to post collateral, which may expose a Fund to greater losses in the event of a default by a counterparty. If such a default occurs, a Fund will have contractual remedies pursuant to the forward contract, but such remedies may be subject to bankruptcy and insolvency laws which could affect such Fund's rights as a creditor. Forward currency transactions include risks associated with fluctuations in foreign currency.
- **Futures Contracts.** Futures contracts are derivative instruments where the parties agree to a fixed price for an agreed amount of securities or other underlying assets at an agreed date or to buy or sell a specific

currency at a future date at a price set at the time of the contract. There may at times be an imperfect correlation between the movement in the prices of futures contracts and the value of their underlying instruments or indexes. Futures contracts may experience dramatic price changes (losses) and imperfect correlations between the price of the contract and the underlying security, index or currency which will increase the volatility of a Fund. Futures contracts may involve a small investment of cash (the amount of initial and variation margin) relative to the magnitude of the risk assumed (the potential increase or decrease in the price of the futures contract). When a Fund purchases or sells a futures contract, it is subject to daily variation margin calls that could be substantial. If a Fund has insufficient cash to meet daily variation margin requirements, it might need to sell securities at a time when such sales are disadvantageous. Equity index futures contracts expose a Fund to volatility in an underlying securities index. There may not be a liquid secondary market for the futures contract. A Fund's use of futures contracts also depends on an investment manager's ability to predict correctly the direction of securities prices, currency exchange rates and other economic factors. Transaction costs associated with futures contracts may be significant, which could cause or increase losses or reduce gains.

- **Options.** A call option gives the purchaser the right to buy an underlying asset or other reference item at a specified price, regardless of the instrument's market price at the time. In order for the purchase of a call option to be profitable to the purchaser, the market price of the underlying security or instrument must rise sufficiently above the call option exercise price to cover the premium and transaction costs. These costs will reduce any profit that might otherwise have been realized had the purchaser bought the underlying instrument instead of the call option. A Fund will receive a premium from writing call options, but the premium received may not be sufficient to offset any losses sustained from exercised options. If a Fund sells a call option on an underlying asset and the underlying asset has increased in value when the call option is exercised, such Fund will be required to sell the underlying asset at the call price and will not be able to realize any of the underlying asset's value above the call price. Furthermore, the asset could still decline in value.

A put option gives the purchaser the right to sell an underlying asset or other reference instrument at a specified price, regardless of the instrument's market price at the time. For the purchase of a put option to be profitable to the purchaser, the market price of the underlying security or instrument must decline sufficiently below the put option's exercise price to cover the premium and transaction costs. By using put options in this manner, the purchaser will reduce any profit it might otherwise have realized from having shorted the declining underlying security by the premium paid for the put option and by transaction costs. A Fund will receive a premium from writing put options, but the premium received may not be sufficient to offset any losses sustained from exercised options. If a Fund sells a put option, there is a risk that such Fund may be required to buy the underlying asset at a disadvantageous price. Options on futures contracts may be subject to additional risks, including risks associated with the underlying futures contract.

If an option that a Fund has purchased expires unexercised, such Fund will experience a loss in the amount of the premium it paid.

Dividend Paying Securities Risk:

Securities that pay higher dividends as a group can fall out of favor with the market, causing these companies to underperform companies that do not pay high or any dividends. An issuer of stock held by a Fund may choose not to declare a dividend or the dividend rate might not remain at current levels. Changes in the dividend policies of companies owned by a Fund and the capital resources available for these companies' dividend payments may reduce the level of dividend payments and adversely affect the Fund. Dividend paying stocks also may not experience the same level of earnings growth or capital appreciation as non-dividend paying stocks.

Emerging Markets Risk:

The economies and political environments of emerging market countries tend to be more unstable than those of developed countries, resulting in more volatile rates of return than the developed markets and substantially greater risk to investors. Emerging markets have unique risks that are greater than or in addition to investing in developed markets because emerging markets are generally smaller, less developed, less liquid and more volatile than the securities markets of the U.S. and other developed markets. Stock markets in many emerging market countries are relatively small, expensive to trade in and generally have higher risks than those in developed markets. Securities in emerging markets also may be less liquid than those in developed markets and foreigners are often limited in their ability to invest in, and withdraw assets from, these markets. Additional restrictions may be imposed under other conditions. Numerous emerging market countries have a history of, and continue to experience serious, and potentially continuing, economic and political challenges. There are also risks of: greater political uncertainties; an economy's dependence on revenues from particular commodities or on international aid

or development assistance; currency transfer restrictions; a limited number of potential buyers for such securities, resulting in increased volatility and limited liquidity for emerging market securities; trading suspensions; and delays and disruptions in securities settlement procedures. In addition, there may be less information available to make investment decisions and more volatile rates of return.

Equity Securities Risk:

Funds that invest in equity securities are subject to market risks and significant fluctuations in price. Equity securities generally are subordinate to an issuer's debt in the event of liquidation or bankruptcy. A Fund's investments in equity securities primarily consist of ADRs, common stocks, and REITs. Investing in such securities may expose the Funds to additional risks.

- **ADRs.** ADRs are receipts issued by domestic banks or trust companies that represent the deposit of a security of a foreign issuer and are publicly traded in the United States. Investments in ADRs are subject to certain of the risks associated with investing directly in foreign securities, including, but not limited to, currency fluctuations, capital restrictions, less liquidity, less government regulation, less publicly available information, increased price volatility, and political, economic and financial instability in the home country of an issuer of the underlying ADR. In addition, foreign companies may use different accounting and financial standards. Such events could negatively affect the value of a Fund's shares. The securities underlying ADRs trade on foreign exchanges at times when the U.S. markets are not open for trading. As a result, the value of ADRs may not track the price of the underlying securities and may change materially at times when the U.S. markets are not open for trading.

- **Common Stock.** The value of a company's common stock may fall as a result of factors directly relating to that company, such as decisions made by its management or decreased demand for the company's products or services. A common stock's value may also decline because of factors affecting not just the company, but also companies in the same industry or sector. The price of a company's common stock may also be affected by changes in financial markets that are relatively unrelated to the company, such as changes in interest rates, exchange rates or industry regulation. Companies that pay dividends on their common stock generally only do so after they invest in their own business and make required payments to bondholders and on other debt and preferred stock. Therefore, the value of a company's common stock will usually be more volatile than its bonds, other debt and preferred stock. Common stock generally is subordinate to the issuing company's debt securities and preferred stock upon the dissolution or bankruptcy of the issuing company.

- **REITs.** Investments in REITs are subject to the risks associated with the real estate industry, adverse governmental actions, declines in property and real estate values, risks related to general and local economic conditions, increases in property taxes and operating expenses, overbuilding, changes in interest rates, liabilities resulting from environmental problems, and the potential failure of a REIT to qualify for federal income-tax-free "pass-through" of net income and net realized gains that are distributed to shareholders and exemption from registration as an investment company. The failure of a company to qualify for treatment as a REIT under the federal tax law likely would have an adverse impact on a Fund's after-tax performance. REITs also are subject to heavy cash flow dependency, defaults by borrowers and self-liquidation. In the event of a default by a borrower or lessee, a REIT may experience delays in enforcing its rights as a mortgagee or lessor and may incur substantial costs to protect its investments. REITs are dependent upon specialized management skills and may invest in relatively few properties, a small geographic area or a small number of property types. Investments in REITs may be volatile. REITs are pooled investment vehicles with their own fees and expenses, and a Fund will indirectly bear a proportionate share of those fees and expenses when investing in REITs.

Fixed Income Securities Risk:

Fixed income securities risk is the risk that the prices of, and the income generated by, fixed income securities held by a Fund may decline significantly and/or rapidly in response to adverse issuer, political, regulatory, general economic and market conditions, or other developments, such as regional or global economic instability (including terrorism, pandemic and related geopolitical risks), interest rate fluctuations, and those events directly involving the issuers that may cause broad changes in market value, public perceptions concerning these developments, and adverse investor sentiment. These events may lead to periods of volatility, which may be exacerbated by changes in bond market size and structure. In addition, adverse market events may lead to increased shareholder redemptions, which could cause a Fund to experience a loss when selling securities to meet redemption requests by shareholders. The risk of loss increases if the redemption requests are unusually large or frequent. A Fund's fixed income investments may be subject to unusual liquidity issues, and, in some cases, credit downgrades and increased likelihood of default.

Foreign Securities Risk:

Non-U.S. investments carry potential risks not associated with domestic investments. Such risks include, but are not limited to: currency exchange rate fluctuations, political and financial instability, less liquidity

and greater volatility of foreign investments, lack of uniform accounting, auditing and financial reporting standards, different government regulation and supervision of foreign banks, stock exchanges, brokers and listed companies, increased price volatility, and delays in transaction settlement in some foreign markets. There may be very limited oversight of certain foreign banks or securities depositories that hold foreign securities and currency and the laws of certain countries may limit the ability to recover such assets if a foreign bank or depository or their agents goes bankrupt. To the extent a Fund invests a significant portion of its assets in securities of a single country or geographic region at any one time, it is more likely to be affected by events or conditions in that country or region. As a result, such Fund may be more volatile than a more geographically diversified fund. In addition, as a result of increasingly interconnected global economies and financial markets, the value and liquidity of a Fund's investments may be negatively affected by events impacting a country or region, regardless of whether the Fund invests in issuers located in or with significant exposure to such country or region. Investments in foreign securities subject to a Fund to the risk of market timing activities by shareholders. Some investors may engage in frequent short-term trading in a Fund to take advantage of any price differentials that may be reflected in the NAV of a Fund's shares.

***Geographic
Concentration Risk:***

The Fund may focus its investments in companies located in or economically tied to particular countries or geographic regions. This could increase the risk that economic, political, business, regulatory, diplomatic, social and environmental conditions in that particular country or geographic region may have a significant impact on the Fund's performance. Investing in such a manner could cause the Fund's performance to be more volatile than the performance of more geographically diverse funds. The economies and financial markets of certain countries or regions can be highly interdependent. Therefore, a decline in the economies or financial markets of one country or region may adversely affect the economies or financial markets of another. Periods of unusually high financial market volatility and restrictive credit conditions, at times limited to a particular geographic area, have occurred in the past and may be expected to recur in the future. In addition, the risks associated with investing in a narrowly defined geographic area are generally more pronounced with respect to investments in emerging market countries.

European Securities Risk – To the extent the Fund invests significantly in the securities of European companies, the Fund's performance may be influenced by social, political and economic conditions in Europe. The economies of European Union ("EU") member countries and their trading partners, as well as the broader global economy, may be adversely affected by changes in the euro's exchange rate, changes in EU or governmental regulations on trade, and the threat of default or an actual default by an EU member country on its sovereign debt, which could negatively impact a Fund's investments and cause it to lose money. The EU's Economic and Monetary Union requires eurozone countries to comply with restrictions on interest rates, deficits, debt levels, and inflation rates, fiscal and monetary controls, and other factors, each of which may significantly impact European countries and their economic partners. Decreasing imports or exports, changes in governmental or other regulations on trade, changes in the exchange rate of the euro, the threat of default or actual default by one or more EU member countries on its sovereign debt, and/or an economic recession in one or more EU member countries may have a significant adverse effect on the economies of other EU member countries and major trading partners outside Europe. In recent years, the European financial markets have experienced volatility and adverse trends due to concerns relating to economic downturns, rising government debt levels and national unemployment and the possible default of governmental debt in several European countries. Responses to financial problems in European governments may not work, may result in social unrest and may limit future growth and economic recovery or have other unintended consequences.

United Kingdom Securities Risk – A Fund's exposure to issuers located in, or with economic ties to, the United Kingdom, could expose a Fund to risks associated with investments in the United Kingdom to a greater extent than more geographically diverse funds. Investments in United Kingdom issuers may subject a Fund to regulatory, political, currency, and economic risks specific to the United Kingdom. On January 31, 2020, the United Kingdom left the EU and entered into a transition period that is scheduled to end on December 31, 2020. There is still considerable uncertainty relating to the potential consequences of the exit, including with respect to the negotiations of new trade agreements during the transition period, the effect of Brexit on the United Kingdom's economy or the broader global economy or the value of the British pound, and whether the United Kingdom's exit will increase the likelihood of other countries also departing the EU. The range and potential implications of possible political, regulatory, economic and market outcomes cannot be fully known. The depreciation of the British pound sterling and/or the Euro in relation to the US dollar as a result of Brexit would adversely affect the Fund's investments denominated in British pound sterling or Euros. During this period of uncertainty, the negative impact on not only the United Kingdom and European economies, but also the broader global

economy, could be significant, potentially resulting in increased volatility in exchange rates and interest rates, illiquidity, and lower economic growth for companies that rely significantly on Europe for their business activities and revenues. The United States and other European countries are substantial trading partners of the United Kingdom. As a result, the United Kingdom economy may be impacted by changes to the economic condition of the United States and other European countries.

Government-Sponsored Enterprises Risk:

Investments in U.S. Government-sponsored enterprises are debt obligations issued by agencies and instrumentalities of the U.S. Government. These obligations vary in the level of support they receive from the U.S. Government. They may be: (i) supported by the full faith and credit of the U.S. Treasury, such as those of the Government National Mortgage Association; (ii) supported by the right of the issuer to borrow from the U.S. Treasury, such as those of the Federal Home Loan Bank and the Federal Farm Credit Banks; (iii) supported by the discretionary authority of the U.S. Government to purchase the agency obligations, such as those of the Federal National Mortgage Association and the Federal Home Loan Mortgage Corporation; or (iv) supported only by the credit of the issuer, such as those of the Federal Farm Credit Bureau. The U.S. Government may choose not to provide financial support to U.S. Government-sponsored enterprises if it is not legally obligated to do so, in which case an issuer may not have the funds to meet its payment obligations. If the issuer defaulted, a Fund holding securities of such issuer might not be able to recover its investment from the U.S. Government. Like all bonds, U.S. Government-sponsored enterprise bonds are also subject to market risk, credit risk and interest rate risk.

Hedging Risk:

Gains or losses from positions in hedging instruments may be much greater than the instrument's original cost. The counterparty may be unable to honor its financial obligation to a Fund. In addition, the Adviser may be unable to close the transaction at a desired time or at the price it believes the security is currently worth. If a Fund uses a hedging instrument at the wrong time or judges the market conditions incorrectly, or the hedged instrument does not correlate to the risk sought to be hedged, the hedge might be unsuccessful, reduce such Fund's return, or create a loss. A Fund is not required to hedge and may not do so.

Inflation Risk:

Stocks, bonds and other securities may fall in value due to higher actual or anticipated inflation. Further, a rapid increase in prices for goods and services may have an adverse effect on corporate profits and consumer spending, which also may result in lower values for stocks, bonds and other securities.

Interest Rate Risk:

Changes in interest rates may affect the yield, liquidity and value of investments in income producing or debt securities. The market values of fixed income securities are generally inversely related to actual changes in interest rates. Generally, when interest rates rise, the market value of a Fund's fixed income securities generally will decrease, and when interest rates decline the value of a Fund's fixed income securities generally will increase. Interest rate changes can be sudden and unpredictable, and are influenced by a number of factors, including government policy, monetary policy, inflation expectations, perceptions of risk, and supply and demand of debt securities. Changes in government monetary policy may substantially impact interest rates, but there can be no guarantee that any particular policy will be continued, discontinued or changed, or that it will have the desired effect on interest rates. Short-term and long-term interest rates, and interest rates in different countries, do not necessarily move in the same direction or by the same amount. As of the date of this prospectus, interest rates are historically low. In the future, interest rates may increase, significantly and rapidly, which could result in significant losses for a Fund. During periods of very low or negative interest rates, a Fund may be unable to develop positive returns. Certain European countries and Japan have recently experienced negative interest rates on deposits and debt securities have traded at negative yields. Negative interest rates may become more prevalent among U.S. and foreign issuers. The yields received by a Fund on its fixed income investments will generally decline as interest rates decline. Typically, the longer the maturity or duration of a debt security, the greater the effect a change in interest rates could have on the security's price. Duration is a measurement of a debt security's sensitivity to changes in interest rates. For every 1% change in interest rates, a debt security's price generally changes approximately 1% in the opposite direction for each year of duration. For example, if a portfolio of fixed income securities has an average weighted duration of ten years, its value can be expected to fall about 10% if interest rates rise by 1%. Conversely, the portfolio's value can be expected to rise approximately 10% if interest rates fall by 1%.

Investment Risk:

An investment in a Fund is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The share price of a Fund fluctuates, which means that when you sell your shares of a Fund, they could be worth less than what you paid for them. Therefore, you may lose money by investing in a Fund.

Large Cap Companies Risk:

The securities of large market capitalization companies may underperform other segments of the market because such companies may be less responsive to competitive challenges and opportunities, such as changes in technology and consumer tastes. Large market capitalization companies may be unable to

attain or maintain the high growth rate of successful smaller companies, especially during extended periods of economic expansion.

LIBOR Transition Risk: A Fund may invest in securities or derivatives that use the London Interbank Offered Rate (“LIBOR” or “ICE LIBOR”) as a benchmark or reference rate for interest rate calculations. LIBOR is produced daily by averaging the rates reported by a number of banks and may be a significant factor in determining a Fund’s payment obligations under a derivative instrument, the cost of financing to a Fund, or an investment’s value or return to a Fund, and may be used in other ways that affect a Fund’s performance. Plans are underway to phase out the use of LIBOR by the end of 2021. There remains uncertainty regarding the nature of any replacement rate and the impact of the transition from LIBOR on a Fund and the financial markets generally. Financial industry groups have begun planning for a transition to the use of a different reference or benchmark rate, but there are obstacles to converting certain securities and transactions to a new reference or benchmark rate. The transition process, or the failure of an industry to transition, could lead to increased volatility and illiquidity in markets for instruments that currently rely on LIBOR to determine interest rates and a reduction in the values of some LIBOR-based investments, all of which could impact a Fund. While some LIBOR-based instruments may contemplate a scenario where LIBOR becomes unavailable by providing for an alternative rate-setting methodology, not all may have such provisions and there may be significant uncertainty regarding the effectiveness of any such methodologies. In addition, the alternative reference or benchmark rate may be an ineffective substitute, potentially resulting in prolonged adverse market conditions for a Fund. Because the usefulness of LIBOR as a benchmark could deteriorate during the transition period, these effects could occur prior to the end of 2021.

Liquidity Risk: When there is little or no active trading market for specific types of securities, it can become more difficult for a Fund to sell the securities at or near their perceived value. During such periods, certain investments held by a Fund may be difficult to sell at favorable times or prices. As a result, a Fund may have to lower the price on certain securities that it is trying to sell, sell other securities instead or forego an investment opportunity, and of which could have a negative effect on the Fund. Market developments may cause a Fund’s investments to become less liquid or illiquid and subject to erratic price movements. Investments that are illiquid or that trade in lower volumes may be more difficult to value. A Fund also may not receive proceeds from the sale of certain investments for an extended period of time. Certain investments that were liquid when purchased may become illiquid, sometimes abruptly, particularly in times of overall economic distress or adverse investor perception. An inability to sell a portfolio position can adversely affect a Fund’s value or prevent the Fund from being able to take advantage of other investment opportunities. The ability of broker-dealers to make a market in fixed income securities has decreased in recent years, in part as a result of structural changes, including fewer proprietary trading desks at broker-dealers and increased regulatory capital requirements. Further, many broker-dealers have reduced their inventory of certain fixed income securities. This could negatively affect a Fund’s ability to buy or sell fixed income securities, and increase their volatility and trading costs.

Significant securities market disruptions related to outbreaks of COVID-19 have led to dislocation in the market for a variety of fixed income securities (including, but not limited to, commercial paper, corporate debt securities, certificates of deposit, asset-backed debt securities and municipal obligations), which has decreased liquidity and sharply reduced returns of certain fixed income securities. Redemptions by a few large investors in a Fund at such times may have a significant adverse effect on a Fund’s net asset value and remaining Fund shareholders. A Fund may lose money or face difficulty in meeting shareholder redemptions if it is forced to sell certain investments to meet redemption requests or other cash needs. Liquidity risk is particularly acute in the case of foreign investments that are traded in smaller, less-developed or emerging markets and securities issued by issuers with smaller market capitalizations.

Market Risk: A Fund is subject to the risk that the securities markets will move down, sometimes rapidly and unpredictably, based on overall economic conditions and other factors, which may negatively affect the Fund’s performance. Markets may at times be volatile and the value of a Fund’s investments may decline in price, sometimes significantly and/or rapidly, because of changes in prices of its holdings or a broad decline in the financial markets. The value of a security may decline due to adverse issuer-specific conditions or general market conditions which are not specifically related to a particular company, such as real or perceived adverse geopolitical, regulatory, market, economic or other developments that may cause broad changes in market value, changes in the general outlook for corporate earnings, changes in interest or currency rates, public perceptions concerning these developments or adverse investment sentiment generally. Changes in the financial condition of a single issuer can impact the market as a whole. The value of a security may also decline due to factors that affect a particular industry or

industries, such as tariffs, labor shortages or increased production costs and competitive conditions within an industry. During a general downturn in the securities markets, multiple asset classes may decline in value simultaneously. Geopolitical and other events, including war, terrorism, economic uncertainty, trade disputes, pandemics, public health crises and related events have led, and in the future may continue to lead, to instability in world economies and markets generally. A rise in protectionist trade policies, risks associated with the United Kingdom leaving the EU, commonly referred to as “Brexit,” the risk of a “trade war” between the United States and China, and the possibility of changes to some international trade agreements could affect the economies of many nations, including the United States, in ways that cannot necessarily be foreseen at the present time. The outcome of Brexit may cause increased volatility and have a significant adverse impact on world financial markets. Market disruptions have caused, and may continue to cause, broad changes in market value, negative public perceptions concerning these developments, and adverse investor sentiment or publicity.

An epidemic outbreak and governments’ reactions to such a public health crisis could cause uncertainty in the markets and may adversely affect the performance of the global economy. Certain illnesses spread rapidly and have the potential to significantly and adversely affect the global economy. An outbreak of infectious respiratory illness caused by a novel coronavirus known as COVID-19 was first detected in China in December 2019 and has now been detected globally. As of the date of this prospectus, the impact of the outbreak has been rapidly evolving. The transmission of COVID-19 and efforts to contain its spread have resulted in significant disruptions to business operations, supply chains and customer activity, widespread business closures and layoffs, travel restrictions, closed international borders, enhanced health screenings at ports of entry and elsewhere, prolonged quarantines and stay-at-home orders, disruption of and delays in healthcare service preparation and delivery, service and event cancellations and reductions, and lower consumer demand, as well as general concern and uncertainty that has negatively affected the global economy. Public health crises caused by the COVID-19 outbreak may exacerbate other pre-existing political, social and economic risks in certain countries or globally. The duration of the COVID-19 outbreak and its effects cannot be determined with certainty and further developments could result in additional disruptions and uncertainty. These impacts have caused significant volatility in global financial markets, which have caused losses for investors. The impact of the COVID-19 pandemic may last for an extended period of time and could result in a substantial economic downturn or recession.

Policy changes by the U.S. Government, the U.S. Federal Reserve and/or foreign governments and political events within the U.S. and abroad, such as the U.S. Government’s inability at times to agree on a long-term budget and deficit reduction plan, the threat of a federal government shutdown and threats not to increase the federal government’s debt limit, may affect investor and consumer confidence and may adversely impact financial markets and the broader economy, perhaps suddenly and to a significant degree. The U.S. Federal Reserve has taken numerous measures to address the economic impact of the COVID-19 pandemic, such as the reduction of the federal funds target rate, and the U.S. federal government has taken steps to stimulate the U.S. economy, including adopting an estimated \$2 trillion economic stimulus package targeted at large parts of the economy. The effect of these and other efforts that may be taken are not yet known, and it is not known whether and to what extent they will be successful. There is a risk that policy changes by the U.S. Government, the U.S. Federal Reserve and/or foreign governments could cause increased volatility in financial markets and higher levels of shareholder redemptions, which could have a negative impact on a Fund.

Markets and market participants are increasingly reliant upon both publicly available and proprietary information data systems. Data imprecision, software or other technology malfunctions, programming inaccuracies, unauthorized use or access, and similar circumstances may impair the performance of these systems and may have an adverse impact upon a single issuer, a group of issuers, or the market at large. In certain cases, an exchange or market may close or issue trading halts on either specific securities or even the entire market, which may result in a Fund being, among other things, unable to buy or sell certain securities or financial instruments or accurately price its investments. These fluctuations in securities prices could be a sustained trend or a drastic movement. The financial markets generally move in cycles, with periods of rising prices followed by periods of declining prices. The value of your investment may reflect these fluctuations.

Mortgage Pass-Through Securities Risk:

Investments in mortgage pass-through securities are subject to market risks for fixed income securities which include, but are not limited to, market risk, interest rate risk and credit risk. Mortgage pass through securities also are subject to prepayment risk and extension risk. When interest rates decline, borrowers tend to repay their mortgages more quickly, such as by refinancing them. When this occurs, the

mortgages that back these securities suffer a higher rate of prepayment. When mortgages are prepaid, a Fund may have to reinvest in securities with a lower yield or fail to recover premiums paid for securities with higher interest rates. This could cause a decrease in a Fund's income and net asset value. Extension risk is the flip side of prepayment risk. When interest rates rise, mortgage payments may decline and principal may be paid later than expected, extending the duration of these securities and a Fund may exhibit additional volatility.

Other Investment Companies Risk:

A Fund that invests in shares of other registered investment companies, including money market funds, will indirectly bear the fees and expenses charged by those investment companies in addition to a Fund's direct fees and expenses. The cost of investing in such a Fund, therefore, may be higher than the cost of investing in a fund that invests directly in individual stocks and bonds. A Fund must rely on the investment company in which it invests to achieve its investment objective. If the investment company fails to do so, the value of a Fund's investment may decline, adversely affecting a Fund's performance. A Fund is also subject to the risks associated with the underlying investments held by the investment company. Investment in money market funds are subject to interest rate risk, credit risk, and market risk.

Preferred Stocks Risk:

If interest rates rise, the dividend on preferred stocks may be less attractive, causing the price of preferred stocks to decline. Preferred stocks may have mandatory sinking fund provisions, as well as provisions for their call or redemption prior to maturity which can have a negative effect on their prices when interest rates decline. Issuers may threaten preferred stockholders with the cancellation of all dividends and liquidation preference rights in an attempt to force their conversion to less secure common stock. Certain preferred stocks are equity securities because they do not constitute a liability of the issuer and therefore do not offer the same degree of protection of capital or continuation of income as debt securities. The rights of preferred stock on distribution of a corporation's assets in the event of its liquidation are generally subordinated to the rights associated with a corporation's debt securities. Therefore, in the event of an issuer's bankruptcy, there is substantial risk that there will be nothing left to pay preferred stockholders after payments, if any, to bondholders have been made. Preferred stocks may also be subject to credit risk.

Redemption Risk:

A Fund may experience periods of significant redemptions that could cause a Fund to sell assets at inopportune times or at a loss or depressed value. Redemption risk is greater to the extent that one or more investors or intermediaries control a large percentage of investments in a Fund, have shorter investment horizons, or have unpredictable cash flow needs. Redemption risk is heightened during periods of rising interest rates and declining or illiquid markets, which may cause investors to move out of fixed income securities on a large scale. Additionally, the market-making capacity of dealers has been reduced in recent years, in part as a result of structural changes, such as fewer proprietary trading desks at broker dealers and increased regulatory capital requirements. Significant redemptions, whether by a few large investors or many smaller investors, could hurt a Fund's performance. This risk is heightened if a Fund invests in emerging market securities, which are generally less liquid than the securities of U.S. and other developed markets. The sale of assets to meet redemption requests may require a Fund to realize net capital gains, which could require a Fund to make substantial capital gains distributions to its shareholders.

Sector Weighting Risk:

A Fund may focus its investments in particular sectors of the economy. To the extent a Fund emphasizes investments in particular sectors of the economy, a Fund will be subject to a greater degree of risks particular to those sectors. Market conditions, interest rates, and economic, regulatory, financial or geopolitical developments could significantly affect securities in particular sectors. Depending on the weightings of a Fund's investment in particular sectors, the Fund may have increased exposure to price movements of securities in those sectors. A Fund's sector weightings could have an adverse impact on the Fund and lead to a decline in the Fund's net asset value.

Security Selection Risk:

Securities selected by the Adviser may perform differently than the overall market or may not meet the Adviser's expectations. This may be a result of specific factors relating to the issuer's financial condition or operations or changes in the economy, governmental actions or inactions, factors affecting a security's industry, poor operating performance, weak demand for an issuer's products or services, an issuer's failure to meet earnings or other operating performance expectations, financial leverage or credit deterioration, litigation or regulatory issues, a decline in the value of an issuer's business and assets, or changes in investor perceptions regarding the issuer. This could result in a Fund's underperformance compared to other funds with similar investment objectives.

Small Cap Companies Risk:

Investments in small capitalization companies generally involve greater risks and the possibility of greater price volatility than investments in larger, more established companies. Small capitalization

companies often have narrower commercial markets and more limited operating histories, product lines, and managerial and financial resources than larger, more established companies. As a result, performance can be more volatile and they face greater risk of business failure, which could increase the volatility of a Fund's portfolio. Additionally, small capitalization companies may have less market liquidity than larger capitalization companies, and they can be sensitive to changes in interest rates, borrowing costs and earnings. Generally, the smaller the company size, the greater these risks.

Small and Mid Cap Companies Risk:

Investments in small and mid capitalization companies generally involve greater risks and the possibility of greater price volatility than investments in larger, more established companies. Small and mid capitalization companies often have narrower commercial markets and more limited operating histories, product lines, and managerial and financial resources than larger, more established companies. As a result, performance can be more volatile and they face greater risk of business failure, which could increase the volatility of the Fund's portfolio. Additionally, small and mid capitalization companies may have less market liquidity than larger capitalization companies, and they can be sensitive to changes in interest rates, borrowing costs and earnings. Generally, the smaller the company size, the greater these risks.

U.S. Government Securities Risk:

The securities of U.S. Government agencies and instrumentalities in which a Fund may invest may not be backed by the full faith and credit of the U.S. Government. A security backed by the U.S. Treasury or the full faith and credit of the United States is only guaranteed by the applicable entity as to the timely payment of interest and principal when held to maturity. Notwithstanding that a security may be backed by the full faith and credit of the U.S. Government, circumstances could arise that could prevent the payment of interest or principal, which would result in losses to a Fund. The market prices for such securities are not guaranteed and will fluctuate. In addition, because many types of U.S. Government securities trade actively outside the United States, their prices may rise and fall as changes in global economic conditions affect the demand for these securities. Any guarantee by the U.S. government or its agencies or instrumentalities of a security a Fund holds does not apply to the market value of the security or the shares of the Fund. Like all fixed income securities, U.S. Government fixed income securities are also subject to market risk, credit risk and interest rate risk.

Valuation Risk:

A Fund is exposed to the risk that it has valued a security at a price different from the price at which the security can be sold. This risk may be especially pronounced for investments, such as derivatives and foreign investments, which may be illiquid or which may become illiquid, and for securities that trade in relatively thin markets and/or markets that experience extreme volatility. If market conditions make it difficult to value certain investments, a Fund may value these investments using more subjective methods, such as fair-value methodologies. Investors who purchase or redeem a Fund's shares on days when such Fund is holding fair-valued securities may receive fewer or more shares, or lower or higher redemption proceeds, than they would have received if such Fund had not fair-valued the securities or had used a different valuation methodology. The value of foreign securities and currencies, as applicable, may be materially affected by events after the close of the markets on which they are traded, but before such Fund determines its NAV. A Fund's ability to value its investments in an accurate and timely manner may be impacted by technological issues and/or errors by third party service providers, such as pricing services or accounting agents.

Variable and Floating Rate Securities Risk:

The interest rates payable on certain fixed income securities in which a Fund may invest are not fixed and may fluctuate based upon changes in market rates. A variable rate obligation has an interest rate which is adjusted at predesignated periods in response to changes in the market rate of interest on which the interest rate is based. The interest rate on a floating rate bond is a variable rate which is tied to another interest rate, such as a money-market index or Treasury bill rate. Additionally, such obligations are subject to interest rate risk and may fluctuate in value in response to interest rate changes if there is a delay between changes in market interest rates and the interest reset date for the obligation, or for other reasons. Variable and floating rate bonds are less effective at locking in a particular yield and are subject to market risk, interest rate risk and credit risk. Nevertheless, such bonds may fluctuate in value in response to interest rate changes if there is a delay between changes in market interest rates and the interest reset date for the bond, or for other reasons.

PORTFOLIO HOLDINGS INFORMATION

The Funds make available their top ten and complete portfolio holdings on their website (www.lkcmfunds.com) on a quarterly basis. The top ten and complete portfolio holdings information is generally available no earlier than 10 and 30 days after the end of the calendar quarter, respectively, and will remain available through at least the end of the current quarter. Beginning June 1, 2020, monthly portfolio disclosures will be filed quarterly with the SEC on Form N-PORT, with quarter-end disclosures being made public

60 days after the end of each fiscal quarter. A description of the Funds' policies and procedures with respect to the disclosure of the Funds' portfolio securities is available in the Funds' Statement of Additional Information. The Statement of Additional Information is available by contacting the Funds at 1-800-688-LKCM or at www.lkcmfunds.com.

MANAGEMENT

INVESTMENT ADVISER

Luther King Capital Management Corporation (the "Adviser"), 301 Commerce Street, Suite 1600, Fort Worth, Texas 76102, serves as the investment adviser to the Funds. The Adviser was founded in 1979 and provides investment management services to investment companies, employee benefit plans, endowment funds, foundations, estates, trusts, high net-worth individuals, and private investment funds. As of December 31, 2019, the Adviser had approximately \$18.3 billion in assets under management.

Under an Investment Advisory Agreement with the Funds, each Fund pays the Adviser an advisory fee, calculated daily and payable quarterly, equal to the annual rate set forth under "Contractual Advisory Fee" in the table below based on the Fund's average daily net assets for the quarter. The Adviser has contractually agreed to waive its advisory fees and/or reimburse expenses through May 1, 2021 to the extent necessary to keep the total operating expenses for the Funds from exceeding the respective caps shown in the table below as a percentage of average daily net assets. This expense limitation excludes interest, taxes, brokerage commissions, indirect fees and expenses related to investments in other investment companies, including money market funds (Acquired Fund Fees and Expenses), and extraordinary expenses. The fee waiver and expense reimbursement agreement may be terminated only with the consent of the Board of Trustees.

The contractual advisory fees, actual advisory fees paid by the Funds net of waivers, and contractual expense caps for the Funds for the fiscal year ended December 31, 2019 were as follows:

	<u>Contractual Advisory Fee</u>	<u>Net Advisory Fee Paid</u>	<u>Expense Cap</u>
Small Cap Equity Fund	0.75%	0.68%	1.00%
Small-Mid Cap Equity Fund	0.75%	0.00%	1.00%
Equity Fund	0.70%	0.51%	0.80%
Balanced Fund	0.65%	0.45%	0.80%
Fixed Income Fund	0.50%	0.22%	0.50%
International Equity Fund	0.90%	0.00%*	1.00%

* Information shown for the period from the Fund's commencement of operations, May 1, 2019, through the fiscal year ended December 31, 2019.

Any fee waiver or reimbursements will have the effect of lowering the overall expense ratio for the applicable Fund and increasing its overall return to investors at the time any such amounts were waived and/or reimbursed.

A discussion regarding the basis on which the Board of Trustees approved the investment advisory agreement for each Fund, is available in the most recent semi-annual report to shareholders for the period ended June 30.

The Adviser has filed a notice claiming the CFTC Regulation 4.5 exclusion from CPO registration with respect to the LKCM International Equity Fund, which is the only Fund that may invest in derivatives.

PORTFOLIO MANAGERS

J. Luther King, Jr., CFA, CIC, is the lead portfolio manager of the LKCM Equity Fund (since inception in 1996). Mr. King is primarily responsible for the day-to-day management of, and oversees the investment team responsible for, the LKCM Equity Fund. Mr. King is also a member of the investment teams responsible for the LKCM Small Cap Equity Fund (since inception in 1994), LKCM Small-Mid Cap Equity Fund (since inception in 2011), LKCM Balanced Fund (since inception in 1997) and LKCM International Equity Fund (since inception in 2019). Mr. King has been President, Principal and Portfolio Manager of the Adviser since 1979, and has been a Trustee of the Funds since 1994. Mr. King graduated with a Bachelor of Science and a Master of Business Administration from Texas Christian University.

Steven R. Purvis, CFA, is the lead portfolio manager of the LKCM Small Cap Equity Fund (since inception in 1996) and LKCM Small-Mid Cap Equity Fund (since inception in 2011). Mr. Purvis is primarily responsible for the day-to-day management of, and oversees the investment team responsible for, both Funds. Mr. Purvis joined the Adviser in 1994 and has served as Principal (since 2004) and Vice President and Portfolio Manager (since 1996). Mr. Purvis has been a Trustee of the Funds since 2013. Mr. Purvis graduated with a Bachelor of Science in Business Administration from the University of Missouri and a Master of Business Administration from the University of Missouri – Kansas City.

Scot C. Hollmann, CFA, CIC, is the lead portfolio manager of the LKCM Balanced Fund (since inception in 1997). Mr. Hollmann is primarily responsible for the day-to-day management of, and oversees the investment team responsible for, the LKCM Balanced Fund. Mr. Hollmann is also a member of the investment teams responsible for the LKCM Equity Fund (since 2010), LKCM Fixed Income Fund (since 2010) and LKCM Aquinas Catholic Equity Fund (since 2017). Mr. Hollmann joined the Adviser in 1983 and has served as Principal (since 1986) and Vice President and Portfolio Manager (since 1983). Mr. Hollmann graduated with a Bachelor of Business Administration and a Master of Business Administration from Texas Christian University.

Joan M. Maynard is the lead portfolio manager of the LKCM Fixed Income Fund (since inception in 1997). Ms. Maynard is primarily responsible for the day-to-day management of, and oversees the investment team responsible for, the LKCM Fixed Income Fund. Ms. Maynard joined the Adviser in 1986 and has served as Principal (since 2015) and Vice President and Portfolio Manager (since 1986). Ms. Maynard graduated with a Bachelor of Business Administration from the University of Texas at San Antonio and a Master of Business Administration from Texas Christian University.

Mark L. Johnson, CFA, CIC, is a member of the investment teams responsible for the LKCM Balanced Fund (since 2010) and LKCM Fixed Income Fund (since 2010). Mr. Johnson joined the Adviser in 2002 and has served as Principal (since 2013) and Vice President and Portfolio Manager (since 2002). Mr. Johnson graduated with a Bachelor of Arts from Duke University.

Mason D. King, CFA, is the lead portfolio manager of the LKCM International Equity Fund (since inception in 2019). Mr. King is primarily responsible for the day-to-day management of, and oversees the investment team responsible for, the LKCM International Equity Fund. Mr. King is also a member of the investment teams responsible for the LKCM Equity Fund (since 2010), the LKCM Small Cap Equity Fund (since 2017), and the LKCM Small-Mid Cap Equity Fund (since 2017). Mr. King joined the Adviser in 2004 and has served as Principal (since 2013) and Vice President, Portfolio Manager and Analyst (since 2004). Mr. King graduated with a Bachelor of Arts from Princeton University and a Master of Business Administration from the University of Texas.

The Statement of Additional Information provides additional information about the portfolio managers' compensation, other accounts managed, and ownership of shares of the Funds that they manage.

DISTRIBUTION OF FUND SHARES

DISTRIBUTOR

Quasar Distributors, LLC, 111 East Kilbourn Avenue, Suite 1250, Milwaukee, Wisconsin 53202, a registered broker-dealer and member of the Financial Industry Regulatory Authority, distributes the Funds' shares.

DISTRIBUTION PLAN

The Funds have adopted a distribution plan under Rule 12b-1 of the Investment Company Act of 1940 (the "Distribution Plan") that allows the Funds to pay distribution and service fees for the sale and distribution of their shares and for services provided to shareholders. The Distribution Plan allows the Funds to finance with Fund assets activities that promote the sale and retention of the Funds' shares such as printing prospectuses and reports and preparing and distributing advertising material and sales literature and providing services to shareholders. The Distribution Plan authorizes each Fund to annually pay up to 0.75% of average daily net assets for distribution and other services.

Currently, the Board of Trustees has not authorized payments under the Distribution Plan and, as a result, the Funds neither accrue nor pay any fees under the Distribution Plan. If the Funds were using the Distribution Plan, because fees would be paid out of a Fund's assets on an ongoing basis, over time these fees would increase the cost of your investment and may cost you more than paying other types of sales charges.

PURCHASE OF SHARES

You may purchase shares of each Fund at the net asset value ("NAV") per share next determined after receipt of the purchase order. Each Fund normally determines NAV as of the scheduled close of normal trading of the New York Stock Exchange ("NYSE") (generally 4:00 P.M. Eastern Time) each day that the NYSE is scheduled to be open for business.

INITIAL INVESTMENTS

The Funds are offered for purchase directly from LKCM Funds, through financial intermediaries who have entered into agreements with the Funds' distributor, and from certain other distribution channels. The policies that apply to the purchase of Fund shares directly through the Funds' transfer agent, U.S. Bancorp Fund Services, LLC, doing business as U.S. Bank Global Fund Services (the "Transfer Agent"), are discussed below. If you establish an account with a broker-dealer or other financial intermediary, ask them for information on how to purchase, sell and exchange Fund shares. Your broker-dealer or other financial intermediary also may charge fees that are in addition to those described in this Prospectus. Each Fund's minimum initial investment is \$2,000, but financial intermediaries may impose different initial investment minimums. Please contact your financial intermediary for information regarding how to purchase, exchange and redeem shares and applicable fees.

Through Your Financial Adviser. You may invest in shares of a Fund by contacting your financial adviser. Your financial adviser can help you open a new account and help you review your financial needs and formulate long-term investment goals and objectives. Investors may be charged a fee if they effect transactions in Fund shares through a broker or agent.

The Funds have authorized certain broker-dealers and other financial intermediaries to receive on their behalf purchase and redemption orders of Fund shares. These broker-dealers may also designate intermediaries to receive Fund orders on their behalf. The Funds are deemed to have received purchase and redemption orders for Fund shares when an authorized broker-dealer or its designee or financial intermediary receives such orders. All such orders are executed at the next NAV calculated after the order is received by an authorized broker-dealer or its designee or financial intermediary. Your broker-dealer or other financial intermediary is responsible

for transmitting orders to be received by the Funds in proper form and in a timely manner. The Funds are not responsible for the failure of a broker-dealer or financial intermediary to transmit a purchase or redemption order in proper form and in a timely manner.

By Mail. You may open an account directly with the Transfer Agent by completing and signing a New Account Application, and mailing it, together with a check (\$2,000 minimum initial investment) payable to LKCM Funds. Your order will not be accepted until the completed New Account Application is received by the Funds or the Transfer Agent.

By regular mail to:

LKCM Funds – [Fund name]
c/o U.S. Bank Global Fund Services
P.O. Box 701
Milwaukee, WI 53201-0701

By express, registered or certified mail to:

LKCM Funds – [Fund name]
c/o U.S. Bank Global Fund Services
615 East Michigan Street, 3rd Floor
Milwaukee, WI 53202

The Funds do not consider the U.S. Postal Service or other independent delivery services to be their agents. Therefore, deposit in the mail or with such services, or receipt at the U.S. Bank Global Fund Services post office box of purchase orders or redemption requests does not constitute receipt by the Transfer Agent. Receipt of purchase orders or redemption requests is based on when the order is received at the Transfer Agent's offices. The Funds are deemed to have received purchase and redemption orders for Fund shares when an authorized broker-dealer or its designee or financial intermediary receives such orders.

Once a Fund receives and accepts your New Account Application in the mail, your payment for shares will be credited to your account at the NAV per share of a Fund next determined after receipt. If you purchase shares using a check or electronic funds transfer through the Automated Clearing House ("ACH") network and soon after make a redemption request, the Funds will honor the redemption request at the next determined NAV, but will not send you the proceeds until your payment for purchase has cleared (within 7 business days). The Funds will not accept payment in cash or money orders. To prevent check fraud, the Funds will not accept third party checks, U.S. Treasury checks, credit card checks, traveler's checks or starter checks for the purchase of shares. The Funds are unable to accept postdated checks or any conditional order or payment. Payment should be made by check in U.S. Dollars drawn on a U.S. bank or credit union. If your bank does not honor your check, you could be liable for any loss sustained by the Funds, as well as a service charge imposed by the Transfer Agent in the amount of \$25.

In compliance with the USA PATRIOT Act of 2001, when you open an account directly with the Funds, please note that the Transfer Agent will verify certain information on your New Account Application as part of the Funds' Anti-Money Laundering Program. As requested on the New Account Application, you must supply your full name, date of birth, social security number and permanent street address. If you are opening the account in the name of a legal entity (e.g., partnership, limited liability company, business trust, corporation, etc.), you must also supply the identity of the beneficial owners. Broker-dealers and other financial intermediaries also are required to comply with the USA PATRIOT ACT and, as a result, may request similar information when you open an account. Mailing addresses containing only a P.O. Box will not be accepted. Please contact the Transfer Agent at 1-800-688-LKCM if you need additional assistance when completing your New Account Application.

If the Funds do not have a reasonable basis for determining your identity, your account will be rejected or you will not be allowed to perform a transaction on the account until the necessary information to confirm your identity is received. The Funds may also reserve the right to close the account within 5 business days if clarifying information/documentation is not received.

By Wire. You may purchase shares of a Fund by wiring federal funds (\$2,000 minimum). If you are making your first investment in the Funds, before you wire funds, the Transfer Agent must have received and processed a completed New Account Application. You can mail or overnight deliver your New Account Application to the Transfer Agent. Upon receipt of your completed New Account Application, the Transfer Agent will establish an account for you. The account number assigned will be required as part of the instruction that should be given to your bank to send the wire. The wire must be received by the time as of which the NAV is calculated in order to receive the same day's NAV. Your bank must include both the name of the Fund you are purchasing, your name and account number so that monies can be correctly applied. Your bank should transmit funds by wire to:

U.S. Bank, N.A.
777 East Wisconsin Avenue
Milwaukee, WI 53202
ABA #075000022
For credit to U.S. Bancorp Fund Services, LLC
Account #112-952-137
For further credit to LKCM Funds
[Name of Fund]
[Shareholder account number]

Federal fund purchases will be accepted only on a day on which the Funds and the custodian are open for business. The Funds and U.S. Bank, N.A. are not responsible for the consequences of delays resulting from the banking or Federal Reserve wire system, or from incomplete wiring instructions.

SUBSEQUENT INVESTMENTS

By Mail or Wire. To make additional investments once you have opened your account (minimum subsequent investment \$1,000), write your account number on a check made payable to LKCM Funds and send it together with the Invest by Mail form from your most recent confirmation statement received from the Transfer Agent to the address noted in the section entitled “Initial Investments – By Mail.” If you do not have the Invest by Mail form, include the Fund name, your name, address, and account number on a separate piece of paper along with your check. Additional investments may also be made by wire. Before sending your wire, please contact the Transfer Agent at 1-800-688-LKCM to advise them of your intent to wire funds. This will ensure prompt and accurate credit upon receipt of your wire. Instruct your bank to wire monies as outlined above.

By Telephone. To make additional investments by telephone, you must check the appropriate box on your New Account Application authorizing telephone purchases. If you have given authorization for telephone transactions and your account has been open for at least 7 business days, you may call the Funds toll free at 1-800-688-LKCM to move money, in the amount of \$1,000 or more, from your bank account to your Fund account upon request. Only bank accounts held at U.S. institutions that are ACH members may be used for telephone transactions. For security reasons, requests by telephone may be recorded. Shares of the Funds will be purchased in your account at the NAV next determined after your order is placed. Telephone trades must be received by or prior to market close. During periods of high market activity, shareholders may encounter higher than usual call waits. Please allow sufficient time to place your telephone transaction.

If you purchased shares of a Fund through a financial intermediary, you must contact your financial intermediary for information concerning how to effect subsequent investments in the Fund’s shares.

AUTOMATIC INVESTMENT PROGRAM

The Automatic Investment Program (the “Program”) permits investors that own shares of a Fund with a value of \$2,000 or more to purchase shares (minimum of \$100 per transaction) at regular intervals selected by the investor. This Program provides a convenient method to have monies deducted from your checking or savings account, for investment into a Fund, on a monthly or quarterly basis. Only bank accounts held at domestic institutions that are ACH members may be used for this option. If you wish to change the amount of your investment or to terminate the Program, please contact the Transfer Agent five days prior to the effective date. Additionally, the Transfer Agent will charge a \$25 fee for any payment returned. To establish the Program, an investor must complete the appropriate sections of the New Account Application. For additional information on the Program, please call 1-800-688-LKCM.

RETIREMENT PLANS AND ACCOUNTS

The Funds make available individual retirement accounts (“IRAs”), including Simplified Employee Pension Plans, traditional IRAs, Roth IRAs and IRA “Rollover Accounts,” offered by U.S. Bank Global Fund Services. Detailed information on these plans and accounts is available by calling the Funds at 1-800-688-LKCM. The Transfer Agent charges an annual fee of \$15 for maintaining each plan and account up to a maximum of \$30 per Social Security number, which is in addition to other fees and expenses payable to the Funds or Transfer Agent as described herein. Investors should consult with their own tax advisers before establishing a retirement plan or account.

OTHER PURCHASE INFORMATION

Each Fund reserves the right, in its sole discretion, to suspend the offering of its shares, to reject any purchase order, or to waive any minimum investment requirements.

Purchases of each Fund’s shares will be made in full and fractional shares of the Fund calculated to three decimal places.

POLICY ON PROHIBITION OF FOREIGN SHAREHOLDERS

Shares of the Funds have not been registered for sale outside of the United States. Accordingly, the Funds generally require that all shareholders must be U.S. persons with a valid U.S. taxpayer identification number to open an account with the Funds. The Funds generally do not sell shares to investors residing outside the United States, even if they are United States citizens or lawful permanent residents, except to investors with United States military APO or FPO addresses. The Funds reserve the right to close the account within 5 business days if clarifying information or documentation is not received.

UNCLAIMED PROPERTY

It is important that the Funds maintain a correct address for each shareholder. An incorrect address may cause a shareholder’s account statements and other mailings to be returned to the Funds. Based upon statutory requirements for returned mail, a Fund will attempt to locate the shareholder or rightful owner of the account. If the Fund is unable to locate the shareholder, then it will determine whether the shareholder’s account can legally be considered abandoned. Your mutual fund account may be transferred to the state government of your state of residence if no activity occurs within your account during the “inactivity period” specified in your state’s abandoned property laws. The Funds are legally obligated to escheat (or transfer) abandoned property to the appropriate state’s unclaimed property administrator in accordance with statutory requirements. The shareholder’s last known address of record determines which state has jurisdiction. Please proactively contact the Transfer Agent at 1-800-688-LKCM at least annually to ensure your account remains in active status.

If you are a resident of the state of Texas, you may designate a representative to receive notifications that, due to inactivity, your mutual fund account assets may be delivered to the Texas Comptroller. Please contact the Transfer Agent if you wish to complete a Texas Designation of Representative form.

HOUSEHOLDING

In an effort to decrease costs, the Funds may reduce the number of duplicate prospectuses and Annual and Semi-Annual Reports you receive by sending only one copy of each to those addresses shared by two or more accounts and to shareholders the Funds reasonably believe are from the same family or household. If implemented, and if you would like to discontinue householding for your accounts, please call toll-free at 1-800-688-LKCM to request individual copies of these documents. Once a Fund receives notice to stop householding, it will begin sending individual copies thirty days after receiving your request. This policy does not apply to account statements.

If you hold your Fund shares through a financial intermediary, your financial intermediary's document policies will apply. Please contact your financial intermediary for further information.

MARKET TIMING POLICY

"Market timing" typically refers to the practice of frequent trading in the shares of mutual funds in order to exploit inefficiencies in fund pricing. Market timing transactions include trades in mutual fund shares that occur when the fund's NAV may not fully reflect the value of the fund's holdings – for example, when the fund has in its portfolio particular holdings, such as foreign or thinly traded securities, that are valued on a basis that does not include the most updated information possible. Market timing can have a dilutive effect on the value of the investments of long-term fund shareholders and can increase the transaction costs of a fund, which will be borne by all fund shareholders.

The Funds are typically intended for long-term investing. Market timing by Fund shareholders may adversely affect the Funds by interfering with portfolio management and increasing portfolio transaction and administrative costs. The Board of Trustees of the Funds has adopted policies and procedures to detect and prevent market timing activities in the Funds. To discourage market timing, each Fund charges a 1.00% redemption fee on shares exchanged or redeemed within 30 days of purchase, except on shares held in separately managed accounts of the Adviser. The redemption fee may be waived with the approval of the Board of Trustees. The redemption fee also may be waived by the Adviser or an officer of the Funds, provided such waivers are reported to the Board of Trustees. In addition, a Fund may temporarily suspend or terminate future purchase and exchange orders by investors or groups of investors who the Funds believe have engaged in market timing practices and which may have an adverse impact on the Funds. The Funds will also terminate, without notice, the exchange privilege of any investor who, in the opinion of the Funds, uses the exchange privilege excessively.

The Funds and/or the Adviser monitor for market timers and attempt to detect abusive trading practices. The criteria and techniques may change from time to time as determined by the Funds or the Adviser. The Transfer Agent may reject any purchase or exchange order, in whole or in part, including trading that the Funds or the Adviser believe may be excessive in frequency and/or amount or otherwise potentially disruptive to the affected Funds. Although these efforts are designed to discourage abusive trading practices, these tools cannot eliminate the possibility that such activity will occur.

Furthermore, due to the complexity involved in identifying abusive trading activity and the volume of shareholder transactions the Funds handle, there can be no assurance that the efforts of the Funds or the Adviser will identify all trades or trading practices that may be considered abusive. In addition, the ability of the Funds or the Adviser to monitor trades that are placed by individual shareholders within omnibus and retirement accounts maintained by financial intermediaries may be limited. However, the Funds and the Adviser attempt to monitor aggregate trades placed in omnibus accounts and seek to work with financial intermediaries to discourage shareholders from engaging in abusive trading practices and to impose restrictions on excessive trades. In this regard, the Funds have entered into agreements with certain financial intermediaries that generally require them to provide the Funds with information concerning those individual shareholders involved in any such aggregated trades. For those financial intermediaries with whom the Funds have not entered into such agreements, the Funds treat such intermediaries as individual shareholders for purposes of their market timing and redemption fee policies. However, there can be no assurance that the Funds or the Adviser will be able to detect and prevent abusive trading in accounts maintained by financial intermediaries through the foregoing measures or otherwise.

EXCHANGING SHARES

Exchanges of all or a portion of your investment from a Fund to an identically registered account in another LKCM Fund may be made. Any new account established through an exchange will be subject to the minimum investment requirements described above. Exchanges will be executed on the basis of the relative NAV of the shares exchanged after your request for an exchange is received. An exchange is considered to be a sale of shares of the Fund from which you are exchanging for federal income tax purposes, on which you may realize a taxable gain or loss. In addition, exchanges of shares held for fewer than 30 days will be subject to a 1.00% redemption fee, except shares held in separately managed accounts of the Adviser or as otherwise determined by a Fund in its discretion. The Transfer Agent charges a \$5 fee for each exchange via telephone. Call the Funds to learn more about exchanges. If you purchased shares of a Fund through your financial intermediary, please contact your financial intermediary to determine if you may take advantage of the exchange policies described in this section and for its policies to effect an exchange.

The Funds are intended as long-term investment vehicles and not to provide a means of speculating on short-term market movements. In addition, excessive trading can hurt the Funds' performance and shareholders. Therefore, each Fund may terminate, without notice, the exchange privilege of any investor who uses the exchange privilege excessively. The Funds may change or temporarily suspend the exchange privilege during unusual market conditions.

REDEMPTION OF SHARES

You may redeem shares of the Funds by contacting your financial adviser, by mail or, if authorized, by telephone or wire. The Funds do not charge a fee for making redemptions, except that each Fund charges a 1.00% redemption fee on shares exchanged or redeemed within 30 days of purchase unless such shares are held in separately managed accounts of the Adviser. The redemption fee may be waived with the approval of the Board of Trustees. The redemption fee also may be waived by the Adviser or an officer of the Funds, provided such waivers are reported to the Board of Trustees. If you purchased your shares through a broker-dealer or other financial intermediary, please contact your broker-dealer or financial intermediary for information regarding how to sell your shares.

By Mail. You may redeem your shares by mailing a written request to:

By regular mail to:

LKCM Funds – [Fund name]
c/o U.S. Bank Global Fund Services
P.O. Box 701
Milwaukee, WI 53201-0701

By express, registered or certified mail to:

LKCM Funds – [Fund name]
c/o U.S. Bank Global Fund Services
615 East Michigan Street, 3rd Floor
Milwaukee, WI 53202

The Funds do not consider the U.S. Postal Service or other independent delivery services to be their agents. Therefore, deposit in the mail or with such services, or receipt at the U.S. Bank Global Fund Services post office box of purchase orders or redemption requests does not constitute receipt by the Transfer Agent. Receipt of purchase orders or redemption requests is based on when the order is received at the Transfer Agent's offices. The Funds are deemed to have received purchase and redemption orders for Fund shares when an authorized broker-dealer or its designee or financial intermediary receives such orders. The Funds are not responsible for the failure of a broker-dealer or financial intermediary to transmit a purchase or redemption order in proper form and in a timely manner.

After your request is in "good order" the Fund will redeem your shares at the next NAV. To be in "good order," redemption requests must include the following documentation:

- (a) The share certificates, if issued;
- (b) A letter of instruction, if required, or a stock assignment specifying the number of shares or dollar amount to be redeemed, signed by all registered owners of the shares in the exact names in which they are registered;
- (c) Any required signature guarantees; and
- (d) Other supporting legal documents, if required, in the case of estates, trusts, guardianships, custodianship, corporations, pension and profit sharing plans, and other organizations.

Signature Guarantees. To protect your account, the Funds and U.S. Bank Global Fund Services from fraud, signature guarantees are required to enable the Funds to verify the identity of the person that has authorized a redemption from an account. Signature guarantees, from either a Medallion program member or a non-Medallion program member, are required for (1) redemptions where the proceeds are payable or sent to any person, address or bank account not on record, (2) share transfer requests, and (3) any redemption request if a change of address request has been received by the Transfer Agent within the last 15 calendar days. In addition to the situations described above, the Funds and /or the Transfer Agent reserve the right to require a signature guarantee in other instances based on the circumstances relative to the particular situation. The Funds reserve the right to waive any signature guarantee requirement at their discretion.

Non-financial transactions including establishing or modifying certain services on an account may require a signature guarantee, signature verification from a Signature Validation Program member, or other acceptable form of authentication from a financial institution source.

Signature guarantees will generally be accepted from domestic banks, brokers, dealers, credit unions, national securities exchanges, registered securities associations, clearing agencies and savings associations, as well as from participants in the New York Stock Exchange Medallion Signature Program and the Securities Transfer Agents Medallion Program ("STAMP"). A notary public is not an acceptable signature guarantor. Please contact the Funds at 1-800-688-LKCM for further details.

By Telephone. If you indicated on your New Account Application, or have subsequently arranged in writing to do so, you may redeem shares by calling the Funds. You may have the redemption proceeds mailed by check to the primary registration address or wired directly to your bank. You may also have your proceeds sent via electronic funds transfer through the ACH network to your predetermined bank account. Other redemption fees may be applicable. See the section titled "Other Redemption Information" below. The Transfer Agent imposes a \$15 fee for each wire redemption. There is no charge for an electronic funds transfer, however the

funds may not be available for 2-3 days. The redemption proceeds will be paid to the same bank and account as designated on the New Account Application or in written instructions subsequently received by the Funds. No telephone redemptions may be made within 15 days of any address change.

If you would like to arrange for redemption by wire or telephone or change the bank or account designated to receive redemption proceeds, you must send a written request to the Funds at the address listed in the section entitled “Redemption of Shares – By Mail.” The investor must sign such requests. Further documents and signature verifications may be required.

The Funds reserve the right to refuse a wire or telephone redemption. Procedures for redeeming shares by wire or telephone may be modified or terminated at any time. The Funds and the Transfer Agent will not be liable for any loss, liability, cost or expense for acting upon telephone instructions that are reasonably believed to be genuine. Before executing an instruction received by telephone, the Transfer Agent will use reasonable procedures to confirm that the telephone instructions are genuine. The telephone call may be recorded and the caller may be asked to verify or provide certain personal identification information. If an account has more than one owner or authorized person, the Fund will accept telephone instructions from any one owner or authorized person. If the Funds or their agents follow these procedures, they cannot be held liable for any loss, expense or cost arising out of any telephone redemption request that is reasonably believed to be genuine. This includes fraudulent or unauthorized requests. Once you place a telephone transaction request, it cannot be canceled or modified after the close of regular trading on the NYSE (generally, 4:00 p.m., Eastern Time). Telephone trades must be received by or prior to market close. During periods of high market activity, shareholders may encounter higher than usual call waits. Please allow sufficient time to place your telephone transaction.

Shareholders who have an IRA or other retirement plan must indicate on their written redemption request whether to withhold federal income tax. Redemption requests failing to elect not to withhold tax will generally be subject to 10% withholding.

Shares held in IRA or other retirement plan accounts may be redeemed by telephone at 1-800-688-LKCM. Investors will be asked whether to withhold taxes from any distribution.

30-Day Redemption Fee. If you redeem or exchange shares held for less than 30 days after the date of purchase, you will be subject to a 1.00% redemption fee. This fee will be deducted from the proceeds of your redemption. For purposes of applying the fee, the first day of the holding period is trade date plus one. The holding period will be determined on a “first-in, first-out” basis, meaning the Fund shares purchased first will be redeemed first. The redemption fee will not apply to shares of the Funds held in accounts separately managed by the Adviser. The redemption fee may be waived with the approval of the Board of Trustees. The redemption fee also may be waived by the Adviser or an officer of the Funds, provided such waivers are reported to the Board of Trustees. Transactions in shares of the Funds by financial intermediaries with whom the Funds do not have information sharing agreements in place may be subject to the redemption fee. The redemption fee will be retained by a Fund for the benefit of its shareholders. Redemption fees will not apply to shares acquired through the reinvestment of dividends, or to shares purchased through the Automatic Investment Program.

Other Redemption Information. Payment of the redemption proceeds will normally be made within seven calendar days after receipt of a redemption request in “good order.” Redemption proceeds for shares of the Funds purchased by check or electronic funds transfer through the ACH network may not be distributed until payment for the purchase has been collected, which may take up to seven business days. Shareholders can avoid this delay by utilizing the wire purchase option.

Due to the relatively high cost of maintaining small accounts, the Funds reserve the right to redeem shares in any account for their then-current value (which will be promptly paid to the investor) if at any time, due to redemption by the investor, the shares in the account do not have a value of at least \$1,000. You will receive advance notice of a mandatory redemption and will be given at least 30 days to bring the value of the account up to at least \$1,000.

Normally, redemption proceeds paid via check will be sent via mail within two business days following the business day a Fund receives the redemption order (assuming the order is received in good order prior to the time as of which the day’s NAV is calculated), while redemption proceeds paid via ACH and electronic fund transfers will generally be sent to your bank account within two business days following the business day we receive the redemption order (assuming the order is received in good order prior to the time as of which the day’s NAV is calculated). However, payment of redemption proceeds may take up to 7 calendar days. In addition, the Funds may suspend the right of redemption or postpone redemptions when the NYSE is closed (other than customary weekend and holiday closings) or under any other emergency circumstances permitted by the SEC.

If you are redeeming shares which you recently purchased by check or electronic funds transfer, payment may be delayed to verify that your check or electronic funds transfer has cleared (which may take up to seven business days from the date of purchase). If your account is held through an intermediary, redemption proceeds will generally be paid to the intermediary within two business days following the business day we receive the redemption order (assuming the order is received in good order prior to the time as of which that day’s NAV is calculated).

The Funds typically expect to meet redemption requests by paying out proceeds from cash or cash equivalent portfolio holdings, or by selling portfolio holdings. In stressed market conditions, redemption methods may include redeeming in kind. The Funds have reserved the right to redeem in kind (*i.e.*, in securities) any redemption request during any 90-day period in excess of the lesser of: (i)

\$250,000 or (ii) 1% of a Fund's NAV being redeemed. If your shares are redeemed in kind, then you will incur transaction costs when you subsequently sell the securities distributed to you.

TRANSFER OF REGISTRATION

The registration of Fund shares may be transferred by writing to LKCM Funds, c/o U.S. Bank Global Fund Services, P.O. Box 701, Milwaukee, Wisconsin, 53202-0701. As in the case of redemptions, the written request with signature(s) guaranteed must be received in "good order."

PAYMENTS TO FINANCIAL INTERMEDIARIES

The Funds and the Adviser make payments to certain financial intermediaries in connection with the promotion and sale of shares of the Funds and as compensation for shareholder-related services, including administrative, sub-transfer agency, recordkeeping and shareholder communications services. The Funds and the Adviser also pay such compensation to make shares of the Funds available to investors through certain fund platforms, supermarkets or similar programs or for services provided in connection with such platforms, supermarkets and programs. These payments generally benefit the Funds and may provide applicable financial intermediaries with an incentive to recommend sales of shares of the Funds over other potential investments.

The Funds and the Adviser compensate financial intermediaries differently depending upon the level and type of services provided by such financial intermediaries. The compensation paid to a financial intermediary may be based on a variety of factors, including average net assets of the applicable Fund distributed and/or serviced by the financial intermediary and/or the number of accounts serviced by the financial intermediary that invest in the Funds. Compensation paid by a Fund for distribution-related expenses are made from the Fund's Rule 12b-1 fees. Compensation paid by the Adviser or its affiliates includes amounts from the Adviser's or its affiliates' own resources and constitute what is sometimes referred to as "revenue sharing."

Any compensation received by a financial intermediary, whether from the Funds or the Adviser, and the prospect of receiving such compensation may provide the financial intermediary with an incentive to recommend shares of the Funds over other potential investments. You should ask your financial intermediary for details about any such payments it receives from the Funds or the Adviser, or any other fees, expenses, or commissions your financial intermediary may charge you in addition to those disclosed in this Prospectus.

A Fund's shares may be available for purchase and sale on brokerage and other financial intermediary platforms of firms that have agreements with the Funds' distributor to offer such shares solely when acting as an agent for the investor. The Funds do not charge any front-end load, deferred sales charge or other asset-based fee for sales or distribution of their shares. However, investors that purchase and/or sell shares of a Fund through brokers or other financial intermediaries may be required to pay commissions and/or other types of compensation to such brokers or other financial intermediaries in connection with such purchases or sales in an amount determined and separately disclosed to you by the broker or other financial intermediary. Please contact your broker or other financial intermediary for further detail. Because the Funds are not parties to any such commission arrangement between you and your broker or financial intermediary, any purchases and redemptions of a Fund's shares will be made at the applicable net asset value (before imposition of the commission). Any such commissions charged by a broker or financial intermediary are not reflected in the fees and expenses listed in the "Fees and Expenses of the Fund" section of the Summary Section for each Fund nor are they reflected in the performance information shown in the prospectus for the Funds because they are not charged by the Funds.

VALUATION OF SHARES

Calculation of NAV. The NAV per share is computed by dividing the total value of the investments and other assets of a Fund, less any liabilities, by the total outstanding shares of the Fund. The NAV per share normally is determined as of the scheduled close of normal trading on the NYSE (generally 4:00 p.m. Eastern Time) on each day that the NYSE is scheduled to be open for business. The NAV normally is not determined on days the NYSE is scheduled to be closed. The NYSE is scheduled to be closed on weekends and most national holidays. The price at which a purchase order or redemption request is effected is based on the next calculation of NAV after the order is received by the Fund. A Fund's NAV may not be calculated on days during which the Fund receives no orders to purchase shares and no shares are tendered for redemption. In determining NAV, expenses are accrued and applied daily and investments for which market values are readily available are valued at market value.

Equity securities listed or traded on a U.S. securities exchange for which market quotations are readily available are valued at the last quoted sale price on the exchange on which the security is primarily traded. Nasdaq Global Market securities are valued at the Nasdaq Official Closing Price. Unlisted U.S. equity securities and listed U.S. equity securities not traded on a particular valuation date are valued at the mean of the most recent quoted bid and ask price on the relevant exchanges or markets. Equity securities listed on a foreign exchange for which market quotations are readily available are valued at the last quoted sales price on the exchange on which the security is primarily traded. Debt securities are normally valued at the mean of the closing bid and ask price and/or by using a combination of broker quotations or evaluated prices provided by an independent pricing service. Futures and options on futures are valued at the settlement prices established each day on the principal exchange on which they are traded. Forward contracts are valued based on the forward rate using information provided by an independent pricing service. Other assets and securities for which no market or broker quotations or evaluated prices are readily available are valued in good faith at fair value using guidelines approved by the Board of Trustees.

Fair Value Procedures for the Funds. The Board of Trustees has established policies and procedures that authorize the Adviser to fair value a security in good faith if, among other things, the Adviser determines that (i) closing prices of foreign securities do not reflect their fair market value due to events that occur between the closing of foreign markets and the time at which a Fund calculates its NAV, (ii) trading in a security is halted and does not resume prior to the closing of the exchange or other market on which such security normally trades, or (iii) the price for such security provided by the Funds' independent pricing services appears invalid, is not readily available, or otherwise provides a valuation that in the judgment of the Adviser does not represent the fair market value of such security. The Funds may use prices provided by independent pricing services to assist in the fair valuation of the Funds' portfolio securities. For foreign securities held by the International Equity Fund, such fair value prices generally will be based on such independent pricing services' proprietary multi-factor models that measure movements in relevant indices, market indicators or other factors between the time the relevant foreign markets have closed and a Fund calculates its NAV.

The trading hours for most foreign securities end prior to the scheduled close of the NYSE, generally the time as of which the Funds' NAVs are calculated. Securities listed on a foreign exchange for which market quotations are readily available are valued at the last quoted sales price, unless events materially affecting the value of foreign securities occur. The occurrence of certain events after the close of foreign markets, but prior to the close of the U.S. market (such as a significant surge or decline in the U.S. market and/or movements in relevant indices or other appropriate market indicators) often will result in an adjustment to the trading prices of foreign securities when foreign markets open on the following business day. If such events occur, the Funds may value foreign securities at fair value, taking into account such events and other factors, when they calculate their NAVs. Consequently, fair valuation of portfolio securities may occur on a daily basis. In such cases, use of fair valuation can reduce an investor's ability to seek to profit by estimating a Fund's NAV in advance of the time as of which NAV is calculated. Because some foreign markets are open on days when the Funds do not price their shares, the value of a Fund's holdings (and correspondingly, the Fund's NAV) could change at a time when you are not able to buy or sell Fund shares. If a Fund utilizes fair value pricing, the fair values assigned to such Fund's foreign investments may not be the quoted or published prices of the investments on their primary markets or exchanges.

There can be no assurance that the Funds could purchase or sell a portfolio security at the price used to calculate the Funds' NAVs. In the case of fair valued portfolio securities, lack of information and uncertainty as to the significance of information may lead to a conclusion that a prior valuation is the best indication of a portfolio security's present value. Fair valuations may remain unchanged until new information becomes available. Consequently, changes in the fair valuation of portfolio securities may be less frequent and of greater magnitude than changes in the price of portfolio securities valued by an independent pricing service, or based on market quotations. Valuing securities at fair value involves greater reliance on judgment than valuation of securities based on readily available market quotations. There can be no assurance that a Fund can obtain the fair value assigned to a security if it were to sell the security at approximately the time at which the Fund determines its NAV.

DIVIDENDS, OTHER DISTRIBUTIONS AND TAXES

DIVIDENDS AND OTHER DISTRIBUTIONS

Each of the Small Cap Equity, Small-Mid Cap Equity, Equity and International Equity Funds intends to declare and pay income dividends at least on an annual basis. Each of the Balanced and Fixed Income Funds intends to declare and pay income dividends on a quarterly basis. Each Fund intends to distribute net capital gains, if any, on an annual basis. A Fund may make an additional distribution if necessary to avoid federal income or excise taxes or as otherwise approved by the Board of Trustees.

A Fund's dividends and other distributions, if any, will automatically be paid in additional shares of the Fund unless the shareholder elects otherwise. Such election must be made in writing or by calling the Funds at least five days prior to the record date of the distribution. If a shareholder elects to receive distributions in cash and the U.S. Postal Service cannot deliver the shareholder's check, or if a check remains uncashed for six months, the Funds reserve the right to reinvest the amount of the distribution check in the shareholder's account at the distributing Fund's then-current NAV per share and to reinvest all subsequent distributions.

TAXES

Dividends, whether paid in cash or reinvested in additional shares, from a Fund's net investment income, the excess of its net short-term capital gain over its net long-term capital loss and its net gains from certain foreign currency transactions, if any, will be taxable to its shareholders as ordinary income (unless a shareholder is exempt from income tax or entitled to a tax deferral), except as noted in the following sentence. A Fund's dividends attributable to its "qualified dividend income" (*i.e.*, dividends it receives on stock of most U.S. and certain foreign corporations with respect to which it satisfies certain holding period and other restrictions) generally will be subject to federal income tax for individual and certain other non-corporate shareholders (each, a "non-corporate shareholder") who satisfy those restrictions with respect to the shares on which the Fund dividends were paid at the lower rates for long-term capital gains – a maximum of 15% for a single shareholder with taxable income not exceeding \$441,450 (\$496,600 for married shareholders filing jointly) and 20% for non-corporate shareholders with taxable income exceeding those respective amounts (which apply for 2020 and will be adjusted for inflation annually thereafter). A portion of a Fund's dividends – not exceeding the aggregate dividends it receives from domestic corporations only – also may be eligible for the dividends-received deduction allowed to corporations ("DRD"), subject to similar holding period and other restrictions. There can be no assurance as to what portion, if any, of a Fund's distributions will constitute qualified dividend income or be eligible for the DRD.

Distributions to non-corporate shareholders of net capital gain (that is, the excess of net long-term capital gain over net short-term capital loss), whether paid in cash or reinvested in additional shares (or, if a Fund makes a certain election, any net capital gain that is retained by the Fund), will be taxable as long-term capital gain, at the 15% and 20% maximum rates mentioned above; capital gain distributions to corporate shareholders will be subject to federal income tax at the same rate as ordinary income, 21%. The classification of a Fund's capital gain distribution or retained net capital gain (and, consequently, the applicable tax rate) is determined by the length of time that the Fund has held the securities that generated the gain and not the length of time you have held shares in the Fund. Shareholders will be notified annually as to the federal tax status of dividends and other distributions paid by a Fund.

Any dividends and other distributions a Fund declares in the months of October, November or December to shareholders of record on a date in such a month will be deemed to have been paid by the Fund and received by those shareholders on December 31 if the distributions are paid before February 1 of the following year. If you purchase shares of a Fund shortly before a distribution, you will be subject to income tax on the distribution, even though the value of your investment (plus cash received, if any) remains the same.

When a shareholder redeems shares of a Fund, the redemption may result in a taxable gain or loss, depending on whether the redemption proceeds are more or less than the shareholder's adjusted basis in the shares. Any capital gain a non-corporate shareholder recognizes on a redemption of Fund shares that have been held for more than one year will qualify for the 15% and 20% maximum rates mentioned above. In addition, if shares of a Fund are bought within 30 days before or after redeeming a loss other shares of that Fund (regardless of class), all or part of that loss will not be deductible and instead will increase the basis in the newly purchased shares.

Each Fund is required by federal law to withhold and remit to the U.S. Treasury 24% of dividends, capital gain distributions and redemption proceeds, (regardless of the extent to which gain or loss may be realized) otherwise payable to non-corporate shareholders who fail to certify that the taxpayer identification number furnished to the Fund is correct or who furnish an incorrect number (together with the withholding described in the next sentence, "backup withholding"). Withholding at that rate also is required from each Fund's dividends and capital gain distributions otherwise payable to a non-corporate shareholder who (1) is subject to backup withholding for failure to report the receipt of interest or dividend income properly or (2) fails to certify to the Fund that he or she is not subject to backup withholding or that it is a corporation or other exempt recipient. Backup withholding is not an additional tax, and any amounts so withheld may be credited against a shareholder's federal income tax liability or refunded.

An individual is required to pay a 3.8% federal tax on the lesser of (1) the individual's "net investment income," which generally includes dividends, interest, and net gains from the disposition of investment property (including dividends and capital gain distributions a Fund pays and net gains realized on the redemption or exchange of Fund shares), or (2) the excess of the individual's "modified adjusted gross income" over a threshold amount (\$250,000 for married persons filing jointly and \$200,000 for single taxpayers). This tax is in addition to any other taxes due on that income. A similar tax applies to estates and trusts. Shareholders should consult their own tax advisers regarding the effect, if any, this provision may have on their investment in Fund shares.

A shareholder's basis in shares of a Fund that he or she acquired or acquires after December 31, 2011 ("Covered Shares"), will be determined in accordance with the Funds' default method, which is average basis, unless the shareholder affirmatively elects in writing, which may be electronic, to use a different acceptable basis determination method, such as a specific identification method. Each Fund, or its administrative agent, must report to the Internal Revenue Service ("IRS") and furnish to its shareholders the basis information for Covered Shares. See "Taxation" in the Statement of Additional Information for a description of the rules regarding that election and each Fund's reporting obligation. Fund shareholders should consult with their tax advisers to determine the best IRS-accepted basis determination method for their tax situation and to obtain more information about how the basis reporting law applies to them.

Dividends and other distributions each Fund declares, as well as redemption proceeds, may also be subject to state and local taxes.

The foregoing summarizes some of the important federal income tax considerations generally affecting each Fund and its shareholders. Potential investors in a Fund should see the Statement of Additional Information for further information regarding the tax consequences of investing in the Fund and consult their tax advisers with specific reference to their own tax situation.

INDEX DESCRIPTIONS

The Bloomberg Barclays U.S. Intermediate Government/Credit Bond Index is an unmanaged market value weighted index measuring both the principal price changes of, and income provided by, the underlying universe of securities that comprise the index. Securities included in the index must meet the following criteria: fixed as opposed to variable rate; remaining maturity of one to ten years; minimum outstanding par value of \$250 million; rated investment grade or higher by Moody's Investors Service or equivalent; must be dollar denominated and non-convertible; and must be publicly issued. A direct investment in an index is not possible.

The Lipper Large-Cap Core Funds Index is an unmanaged index generally considered representative of large cap core mutual funds tracked by Lipper, Inc. A direct investment in an index is not possible.

The Lipper Mixed-Asset Target Allocation Growth Funds Index is an unmanaged index generally considered representative of mutual funds tracked by Lipper, Inc. that, by portfolio practice, maintain a mix of between 60%-80% equity securities, with the remainder invested in bonds, cash and cash equivalents. A direct investment in an index is not possible.

The Lipper Short Intermediate Investment-Grade Debt Funds Index is an unmanaged index generally considered representative of short intermediate investment grade mutual funds tracked by Lipper, Inc. A direct investment in an index is not possible.

The Lipper Small-Cap Core Funds Index is an unmanaged index generally considered representative of small cap core mutual funds tracked by Lipper, Inc. A direct investment in an index is not possible.

The Russell 2000[®] Index is an unmanaged index which measures the performance of the 2,000 smallest companies in the Russell 3000[®] Index. The Russell 3000[®] Index is an unmanaged index that measures the performance of the 3,000 largest U.S. companies, based on total market capitalization. A direct investment in an index is not possible.

The Russell 2500[®] Index is an unmanaged index which measures the performance of the 2,500 smallest companies in the Russell 3000[®] Index. The Russell 3000[®] Index is an unmanaged index that measures the performance of the 3,000 largest U.S. companies, based on total market capitalization. A direct investment in an index is not possible.

The S&P 500[®] Index is an unmanaged capitalization-weighted index of 500 selected stocks that is generally considered representative of the performance of large capitalization companies in the U.S. stock market. A direct investment in an index is not possible.

ADDITIONAL INFORMATION

The LKCM Funds (the “Trust”) enters into contractual arrangements with various parties, including among others, the Funds’ investment adviser, principal underwriter, custodian and transfer agent who provide services to the Funds. Shareholders are not parties to any such contractual arrangements or intended beneficiaries of those contractual arrangements, and those contractual arrangements are not intended to create in any shareholder any right to enforce them against the service providers or to seek any remedy under them against the service providers, either directly or on behalf of the Trust.

This Prospectus provides information concerning the Funds that you should consider in determining whether to purchase Fund shares. Neither this Prospectus nor the Statement of Additional Information is intended, or should be read, to be or give rise to an agreement or contract between the Trust, the Trustees or any Fund and any investor, or to give rise to any rights in any shareholder or other person other than any rights under federal or state law that may not be waived. Nothing in this Prospectus, the Statement of Additional Information or the Funds’ reports to shareholders is intended to provide investment advice and should not be construed as investment advice.

FINANCIAL HIGHLIGHTS

The financial highlights tables set forth below are intended to help you understand each Fund's financial performance for the past five years, or if shorter, the period of each Fund's operations. Certain information reflects financial results for a single Fund share. The total returns in the tables represent the rates that an investor would have earned (or lost) on an investment in a Fund (assuming reinvestment of all dividends and other distributions). This information has been derived from the Funds' financial statements and financial highlights which have been audited by Deloitte & Touche LLP, whose report, along with the Funds' financial statements and financial highlights, is incorporated by reference in the Statement of Additional Information and included in the Funds' annual report for the year ended December 31, 2019, which is available free of charge upon request.
